Introduction

This report provides a high-level overview of insurers' financial and risk information, compiled by means of the aggregation of data submitted quarterly by individual South African-registered insurers.

The following should be noted with regards to the data contained in this document:

- data is based on reporting by insurance entities and the prudential standard issued in terms of the Insurance Act 18 of 2017 as implemented in South Africa on 1 July 2018;
- the information is subject to change without notice;
- the calculation of ratios and annual growth is based on actual data and not the rounded figures as indicated in this report;
- the data in this report is for the period ended September 2025.

¹ Expressed as a percentage of net written premium during the period.

² Expressed as a percentage of the number of new policies issued during the period.

³ Normalising reinsurance recoverables as refunds reduced year on year for a particular insurer.

⁴ Structured notes experienced a general increase which was noted across the industry.

⁵ The decrease in other expenses was mainly due to a reclassification out of "other expenses" to "changes in policyholder liabilities" by a particular insurer.

SCR risk components

¹ Expressed as a percentage of net written premium during the period.

² Claims + commission + expenses as a percentage of net earned premium.

³ Expressed as a percentage of net earned premium during the period.

⁴ Growth in investment income was driven by realised gains on disposals coupled by interest, dividends and rentals. This growth is mirrored in the performance of the top four investment portfolios.

⁵ The decrease in underwriting profit was mainly driven by slightly higher claims paid, coupled by an increase in commissions paid over the period of analysis.

MCR cover ratio (Median)	2.8	2.8

SCR risk components

¹ Expressed as a percentage of net earned premium during the period.

² Claims + commission + expenses as a percentage of net earned premium.

³ Higher net earned premiums in 2025 due to one insurer recording higher than normal earned premiums.

⁴ The decrease in investment income was mainly through two major cell captive insurers which realised losses on disposed securities, coupled with a decrease in interest, dividends and rentals.

⁵ The increase in net claims was due to one insurer having a higher claims experience under the motor and guarantee lines of business.

MCR cover ratio (Median)	8.8	8.8

SCR risk components

¹ Expressed as a percentage of net earned premium during the period.

² Claims + commission + expenses as a percentage of net earned premium.

³ Increased earned premiums and an improved overall underwriting performance was mainly driven by one captive insurer realising an improved earned premiums pattern.

⁴ The increase in investment income as a result of an influx in the cash portfolio, coupled with a reduced claims experience (positive recovery from one captive insurer), has resulted in a positive net profit before tax.

⁵ One particular captive insurer shifted its investments by reducing its exposure to corporate bonds and increasing its concentration in government bonds, while simultaneously raising its holdings in investment funds and cash deposits.
