- Beperkings geld vanaf November 1972 op die mate waarin likwiede bankaksepte, handels- en landbouwissels, en promesses, gebruik mag word om aan die likwiede batevereistes te voldoen. As gevolg daarvan kan die "werklike" bedrag aan likwiede bates soos hier getoon, kleiner wees as die banke se totale besit aan alle likwiede bates.
- Die banke moet 'n minimum bedrag aan voorgeskrewe beleggings aanhou wat gelyk is aan 'n vasgestelde persentasie van hul langtermynverpligtings teenoor die publiek soos op die voorafgaande maandeinde. Vanaf Junie 1978 beloop hierdie vereiste 13 persent.

1. Limitations apply from November 1972, to the extent to which liquid bankers' acceptances, trade and agricultural bills, and promissory notes, may be used to meet the liquid asset requirements. As a result, the "actual" amount of liquid assets shown here may be less than the banks' total holdings of all liquid assets.

2. The banks must hold a minimum amount of prescribed investments that is equal to a specified percentage of their long-term liabilities to the public as on the preceding month-end. Since June 1978, this requirement has been 13 per cent.

1. For a more detailed explanation of this analysis the article in the March 1979 issue of the *Quarterly Bulletin* should be consulted. "Banks" comprises all commercial banks, merchant banks, and general banks (including general banks which were registered as hire-purchase banks and savings banks before October 1979).

2. For the purposes of this analysis, the gold component of Reserve Bank's foreign assets was valued at the statutory price of R29.55 per fine ounce (which prevailed from October 1972 to March 1978) up to November 1979. From December 1979 the Bank's gold holdings have been valued at a market related price.

3. Mainly long-term foreign loans extended by the Reserve Bank.

4. Usually only the difference between the market and nominal value of short-term government stock and the Treasury's liability on account of drawings on the International Monetary Fund.

5. Loans by the Reserve Bank to the non-bank private sector, the Reserve Bank's holdings of private-sector securities, and other banking institutions' holdings of private-sector securities ranking as liquid assets.

6. Share of banking institutions in non-liquid asset holdings of the discount houses and NFC in proportion to the banks' holdings of call deposits with these institutions.

1. 'n Konsolidasie van die bates en laste van die Suid-Afrikaanse Reserwebank en die Nasionale Finansiekorporasie van Suid-Afrika. Vir 'n meer gedetailleerde uiteensetting van die geldmarkontleding kan die artikel in die September 1977-uitgawe van die *Kwartaalblad* geraadpleeg word.

2. „Aanduiding van vernouing of verruiming van die geldmark“ word omskryf as veranderings in die monetêre banke se saldo's by die Reserwebank en die Nasionale Finansiekorporasie bo en behalwe die wetlik vereiste minima, min veranderings in akkommodasie verleen deur die Reserwebank en die Nasionale Finansiekorporasie aan hierdie banke. Vir hierdie doel sluit „monetêre banke“ in die diskontohuise en die handelsbanke, aksepbanke en monetêre algemene banke.

3. Bereken van die laste (uitgesonderd oorskotsaldo's van die monetêre banke) en bates (uitgesonderd dié wat akkommodasie aan die monetêre banke verteenwoordig) van die Reserwebank en die Nasionale Finansiekorporasie.

4. Uitsluitende veranderings as gevolg van die maandelikse herwaardering van die Reserwebank se goudvoorraad vanaf April 1978. Vir doelendes van hierdie ontleding, is die Bank se goudvoorraad teen R29,55 per fyn ons vanaf Oktober 1972 tot November 1979, gewaardeer. Vanaf Desember 1979 word dit teen 'n markverwante prys gewaardeer. Ander waardasie-aansuiwerings aan die Bank se besit aan goud en buitelandse valuta reserves word vanaf Januarie 1980 ook in ag geneem by die berekening van gevewens in hierdie kolom.

1. A consolidation of the assets and liabilities of the South African Reserve Bank and the National Finance Corporation of South Africa. For a more detailed explanation of the money market analysis the article in the September 1977 issue of the *Quarterly Bulletin* should be consulted.

2. "Indication of tightening or easing of the money market" is defined as changes in the monetary banks' balances with the Reserve Bank and the National Finance Corporation in excess of the legally required minima, less changes in accommodation granted by the Reserve Bank and the National Finance Corporation to these banks. For this purpose "monetary banks" includes the discount houses and the commercial banks, merchant banks and monetary general banks.

3. Calculated from the liabilities (excluding surplus balances of the monetary banks) and assets (excluding those representing accommodation to the monetary banks) of the Reserve Bank and the National Finance Corporation.

4. Excluding changes on account of the monthly revaluation of the gold holdings of the Reserve Bank from April 1978. For purposes of this analysis, the Bank's gold holdings were valued at R29,55 per fine ounce from October 1972 up to November 1979. From December 1979, they have been valued at a market-related price. Other valuation adjustments to the Bank's gold and foreign exchange holdings have also been taken into account in the calculation of data in this column from January 1980.
