- Source: Statistics South Africa (Stats SA). Published according to the COICOP Classification
- Weights based on expenditure patterns in 2000 were applied to data as from January 2002 up to December 2008. New weights base on the expenditure patterns in 2005 were applied to data as from 2009. These new weights are shown.
- According to the new methodology applied by Stats SA. Some historical data are not available.
- Seasonally adjusted by the South African Reserve Bank.
- Component series have been linked backwards with related components of the new consumer price index for all urban areas, before January 2008, where data allowed. Fixed factors were used based on January 2008.
- As from January 2008 the clothing and footwear index no longer reflects the impact of promotional sales prices on the price level due to a change in methodology by Stats SA.
