2. Weights based on expenditure patterns in 2000 were applied to data as from January 2002 up to December 2008. New weights base on the expenditure patterns in 2005 were applied to data as from 2009. These new weights are shown.

3. According to the new methodology applied by Stats SA. Some historical data are not available.

4. Compared with the same month of the previous year.

5. Component series have been linked backwards with related components of the new consumer price index for all urban areas, before January 2008, where data allowed. Fixed factors were used based on January 2008. Data should be used with circumspection.

6. As from January 2008 the clothing and footwear index no longer reflects the impact of promotional sales prices on the price level due to a change in methodology by Stats SA.

1. Quarterly: compared with the preceding period. Seasonally adjusted annualised rates (seasonally adjusted by the South African Reserve Bank). Monthly: compared with the same month of the previous year.
2. Source: Statistics South Africa (Stats SA). Published according to the COICOP Classification.
3. An administered price is defined by Statistics South Africa as the price of a product, which is set consciously by an individual producer or group of producers and/or any price, which can be determined or influenced by government, either directly, or through one or other government agencies/institutions without reference to market forces.
4. CPIX up to December 2008. Headline CPI from January 2009 onwards.
5. Component series have been linked backwards with related components of the new consumer price index for all urban areas, before January 2008, where data allowed. Fixed factors were used based on January 2008. Data should be used with circumspection.
