S-136 Quarterly Bulletin June 2014

Source of basic data: Statistics South Africa.
 Since January 1995 information of the former TBVC states has been included.
 At constant 2012 prices.
 From the third quarter of 2012 basic data originate from a new expanded Survey of Employment and Earnings and from the fourth quarter of 2004 from the Quarterly Employment Statistics survey by Statistics South Africa.
 Comparability break from December 2003 due to a new survey based on Statistics South Africa's new business register.

#### KB703

S-138 Quarterly Bulletin June 2014

Source: Statistics South Africa (Stats SA). Published according to the COICOP Classification.

Weights based on expenditure patterns in 2000 were applied to data from January 2002 up to December 2008. Weights based on expenditure patterns in 2005 were applied to data from January 2009 to December 2012. New weights based on expenditure patterns in 2010/2011 were applied to data from January 2013 onwards. These new weights are shown.

According to the new methodology applied by Stats SA. Some historical data are not available.

Seasonally adjusted by the South African Reserve Bank.

Component series have been linked backwards with related components of the new consumer price index for all urban areas, before January 2008, where data allowed. Fixed factors were used based on lapuary 2008.

January 2008. As from January 2008 the clothing and footwear index no longer reflects the impact of promotional sales prices on the price level due to a change in methodology by Stats SA.

Source: Statistics South Africa (Stats SA). Published according to the COICOP Classification.

Weights based on expenditure patterns in 2000 were applied to data from January 2002 up to December 2008. Weights based on expenditure patterns in 2005 were applied to data from January 2009 to December 2012. New weights based on expenditure patterns in 2010/2011 were applied to data from January 2013 onwards. These new weights are shown.

According to the new methodology applied by Stats SA. Some historical data are not available.

Seasonally adjusted by the South African Reserve Bank.

Component series have been linked backwards with related components of the new consumer price index for all urban areas, before January 2008, where data allowed. Fixed factors were used based on January 2008.

S-140 Quarterly Bulletin June 2014

Source: Statistics South Africa (Stats SA). Published according to the COICOP Classification.

Weights based on expenditure patterns in 2000 were applied to data from January 2002 up to December 2008. Weights based on expenditure patterns in 2005 were applied to data from January 2009 to December 2012. New weights based on expenditure patterns in 2010/2011 were applied to data from January 2013 onwards. These new weights are shown.

<sup>3.</sup> According to the new methodology applied by Stats SA. Some historical data are not available.

4. Compared with the same month of the previous year.

5. Component series have been linked backwards with related components of the new consumer price index for all urban areas, before January 2008, where data allowed. Fixed factors were used based on January 2008.

6. As from January 2008 the clothing and footwear index no longer reflects the impact of promotional sales prices on the price level due to a change in methodology by Stats SA.

### KB704

S-142 Quarterly Bulletin June 2014

Source: Statistics South Africa
 Weights of final manufactured goods do not add up, as non-metallic mineral products (3,87) and furniture and other manufacturing (2,35) are omitted.
 Weights are at industry level, based on 2013 value-added in the national accounts and will be updated each year from the national accounts data.
 Seasonally adjusted by the South African Reserve Bank.
