KB701

1 Source of basic data: Statistics South Africa.

2 National departments, local authorities, provinces and statutory bodies.

3 Transnet, Sapo, Telkom and SABC.

4 Including catering and accommodation services.

5 Banking institutions, building societies and insurance companies. From the third quarter of 2002, also inclusive of real-estate and business services.

6 From the first quarter of 1998 basic data originate from the *Survey of Employment and Earnings* in selected industries by Statistics South Africa, and are not strictly comparable with earlier data.7 From the third quarter of 2002 basic data originate from a new expanded Survey of Employment and Earnings and from the fourth quarter of 2004 from the *Quarterly Employment Statistics (QES)* survey by Statistics South Africa. From the second quarters of 2013, 2015, 2016, 2017, 2018 and 2019 the QES survey was expanded, resulting in a level shift in certain subsectors. Data were statistically linked to compensate for these structural breaks.

KB706

1 Source of basic data: Statistics South Africa.

2 Since January 1995 information of the former TBVC states has been included.

3 At constant 2016/12 prices.

4 From the third quarter of 2002 basic data originate from a new expanded *Survey of Employment and Earnings* and from the fourth quarter of 2004 from the *Quarterly Employment Statistics* survey by Statistics South Africa.

5 Comparability break from December 2003 due to a new survey based on Statistics South Africa's new business register.

1 Source: Statistics South Africa (Stats SA). Published according to the COICOP Classification.

2 Weights based on expenditure patterns in 2014/2015 were applied to the data from January 2017 onwards. Weights obtained from applying the growth rates in the final consumption expenditure by households, as measured in the national accounts, from December 2016 to 2019 were applied to the data from January 2022 onwards. The latest weight structure is shown on the table.

3 According to the new methodology applied by Stats SA. Some historical data are not available.

4 Seasonally adjusted by the South African Reserve Bank.

5 The consumer price index for all urban areas (which was based on the COICOP classification and published by Stats SA from January 2008 onwards) was statistically linked to the historical consumer price index for metropolitan areas (which was based on the ITC classification that Stats SA discontinued after December 2007).

1 Source: Statistics South Africa (Stats SA). Published according to the COICOP Classification.

2 Weights based on expenditure patterns in 2014/2015 were applied to the data from January 2017 onwards. Weights obtained from applying the growth rates in the final consumption expenditure by households, as measured in the national accounts, from December 2016 to 2019 were applied to the data from January 2022 onwards. The latest weight structure is shown on the table.

3 According to the new methodology applied by Stats SA. Some historical data are not available.

4 Seasonally adjusted by the South African Reserve Bank.

5 The consumer price index for all urban areas (which was based on the COICOP classification and published by Stats SA from January 2008 onwards) was statistically linked to the historical consumer price index for metropolitan areas (which was based on the ITC classification that Stats SA discontinued after December 2007).

Consumer prices: All urban areas¹

1 Source: Statistics South Africa

2 Weights of final manufactured goods do not add up, as non-metallic mineral products (3.16) and furniture and other manufacturing (4.09) are omitted.

3 Weights are at industry level, based on 2015 value-added in the national accounts and will be updated each year from the national accounts data.

4 Seasonally adjusted by the South African Reserve Bank.

KB814

1 Compared with the preceding period. Quarterly changes at seasonally adjusted annualised rates.

2 Per cent. Source: Statistics South Africa, *Quarterly Labour Force Survey*.

3 Seasonally adjusted by the South African Reserve Bank.

4 Compared with the same period in the previous year.

5 Deflated by the non-agricultural gross domestic product deflator.

6 From the third quarter of 2002 basic data originate from a new expanded Survey of Employment and Earnings and from the fourth quarter of 2004 from the *Quarterly Employment Statistics (QES)* survey by Statistics South Africa. From the second quarters of 2013, 2015, 2016, 2017, 2018 and 2019 the QES survey was expanded, resulting in a level shift in certain subsectors. Data were statistically linked to compensate for these structural breaks.

KB815

1 Quarterly: Compared with the preceding period. Seasonally adjusted annualised rates (seasonally adjusted by the South African Reserve Bank).

2 Monthly: Compared with the same month of the previous year.

3 Source: Statistics South Africa (Stats SA). Published according to the COICOP Classification.

4 An administered price is defined by Stats SA as the price of a product, which is set consciously by an individual producer or group of producers and/or any price, which can be determined or influenced by government, either directly, or through one or other government agencies/institutions without reference to market forces.

5 CPIX for metropolitan and other urban areas up to December 2008. Headline CPI for all urban areas from January 2009 onwards.

6 This is the SARB's preferred measure of core inflation. Up to December 2016 fuel included only petrol. From January 2017, fuel includes petrol and diesel.

7 The consumer price index for all urban areas (which was based on the COICOP classification and published by Stats SA from January 2008 onwards) was statistically linked to the historical consumer price index for metropolitan areas (which was based on the ITC classification that Stats SA discontinued after December 2007).
