1 Average amounts as from January 2008.

2 As from April 1993, only that part of the reserve balance in excess of the minimum cash reserve requirement, can be utilised as liquid assets.

3 As from 18 October 2000 all government stock qualifies as liquid assets, irrespective of maturity.

4 Land bank bills up to December 2012. From January 2013 securities guaranteed by specified counterparties as prescribed in the definition of high quality liquid assets.

5 Total holdings include very small amounts of other liquid assets.

6 As from April 1993 the liquid asset requirement has been set at 5 per cent of banks' liabilities, as per notice R696 in Government Gazette No. 14763 of April 1993.

7 As from April 1998 the minimum cash reserve requirement was set at 21½% of banks' liabilities but banks' vault cash holdings qualified in full as part of cash reserves, as per notice R572 in Government Gazette No. 18810 of April 1998. As from September 2001 only 75 per cent of the banks' vault cash holdings qualified as cash reserves, and subsequently the qualifying portion was reduced by 25 percentage points each year. In September 2004 the concession was fully phased out.

8 The average daily minimum reserve balance calculated in respect of a specific month and shown opposite that month has to be held on deposit with the South African Reserve Bank as from the 15th working day of the following month. For example, the banks' liabilities and cash holdings during August give rise to a minimum reserve balance reported opposite August in the table but only held with the South African Reserve Bank as from the 15th working day of September.

1 A new surplus based monetary policy implementation framework (MPIF) was phased in from 8 June 2022 to replace the classical cash reserve or shortage system. A negative amount represents a surplus position and a positive amount a shortage position. Due to the implementation of the new MPIF the annual average for 2022 only takes into account August 2022 to December.

2 Notes in circulation outside the South African Reserve Bank.

3 Values as at month-end. Exchequer Paymaster General, Stabilisation Accounts and other deposits at the South African Reserve Bank. A withdrawal of funds from the National Treasury Sterilisation Deposit Account resulted in a reduction in rand denominated deposit balances.

4 Outstanding amounts at month-end. A negative value represents an injection of liquidity. Money-market swaps with counter foreign-exchange deposits up to November 2003.

5 Total outstanding amounts on 7- and 14-day reverse repurchase transactions (first issued 5 March 2012), 28-day reverse repurchase transactions (first issued 26 April 1999), 56-day reverse repurchase transactions (first issued 24 March 2005) and 91-day reverse repurchase transactions (first issued 17 June 2002) at month-ends. With the implementation of the new monetary policy implementation framework, reverse repurchase transactions were phased out from 8 June 2022, but can be reintroduced when required.

6 Total outstanding amounts on 7- and 14-day SARB debentures (first issued 5 March 2012), 28-day SARB debentures (first issued 16 September 1998), 56-day SARB debentures (first issued 1 December 2004) and 91-day SARB debentures (first issued on 14 August 2002) at month-ends. With the implementation of the new monetary policy implementation framework, SARB debentures were phased out from 8 June 2022, but can be reintroduced when required.

1 A new surplus based monetary policy implementation framework (MPIF) was phased in from 8 June 2022 to replace the classical cash reserve or shortage system.

2 Amount allotted through the SARB's main repurchase auction, held weekly on a Wednesday. From September 2016 to March 2020, the auction allotment was capped at R56 billion, in line with the money market target. The actual money market shortage subsequently declined to between R30 and R35 billion on average, but the amount on offer remained at R56 billion until June 2022. Under the new MPIF the weekly main refinancing auctions has become less important and auction offerings are capped at lower levels.

3 Represents the net position of the day's utilisation of SAMOS settlement accounts. Such facilities are provided at a spread to the repurchase rate. No penalty is imposed on balances deposited in SAMOS on Saturdays.

4 Represents the facility through which the SARB absorbs liquidity. Also includes amounts related to the regional cross-border real-time gross settlement (RTGS) system in the SADC region.

5 Funds placed by South African banks that are within quota and reimbursed at the repo rate. Quotas are determined by banks' relative sizes as well as the total amount of liquidity in the market as decided by the SARB. Due to an expansion in market liquidity banks' quota limits was increased in three steps between 8 March and 6 April 2023.

6 Funds placed by South African banks in excess of the quota are reimbursed at a lower, punitive rate (repurchase rate less 100 basis points).

7 The lending facility through which funds are provided to banks at a higher, punitive rate (repo plus 100 basis points).

8 Supplementary facilities are offered at the discretion of the South African Reserve Bank at the prevailing repurchase rate. Positive amounts represent reverse repurchase transactions and negative amounts repurchase transactions.

9 Banks may access their cash reserve balances on a daily basis, subject to maintaining the average balance within the statutory limit over a period of 28 business days.

10 Expected in-or outflows if previous withdrawals or deposits were to be reversed to ensure compliance with the statutory cash reserve requirement.

11 The end of day liquidity position includes daily supplementary activities as well as net movement in the banks' cash reserve accounts. Surplus liquidity is represented by a positive amount and a shortage by a negative amount.
