1 Source of basic data: Statistics South Africa.

2 National departments, local authorities, provinces and statutory bodies.

3 Transnet, Sapo, Telkom and SABC.

4 Including catering and accommodation services.

5 Banking institutions, building societies and insurance companies. From the third quarter of 2002, also inclusive of real-estate and business services.

6 From the first quarter of 1998 basic data originate from the *Survey of Employment and Earnings* in selected industries by Statistics South Africa, and are not strictly comparable with earlier data.7 From the third quarter of 2002 basic data originate from a new expanded *Survey of Employment and Earnings* and from the fourth quarter of 2004 from the *Quarterly Employment Statistics (QES)* survey by Statistics South Africa. From 2013 and in selected years thereafter, the QES survey was expanded through sample refreshes, resulting in level shifts in certain subsectors during the second quarters. The data were statistically linked to compensate for these structural breaks.

1 Source of basic data: Statistics South Africa.

2 Since January 1995 information of the former TBVC states has been included.

3 From the third quarter of 2002 basic data originate from a new expanded *Survey of Employment and Earnings* and from the fourth quarter of 2004 from the *Quarterly Employment Statistics* survey by Statistics South Africa.

4 Comparability break from December 2003 due to a new survey based on Statistics South Africa's new business register.

5 These statistics are published on a quarterly basis.

6 Although these statistics are published quarterly, the reference period is one month, and data are collected for the months of February, May, August, and November.

¹ Source: Statistics South Africa (Stats SA). Published according to the updated COICOP 18 classification.² Weights based on expenditure patterns in the 2022/23 *Income and Expenditure Survey (IES)* were applied to data from January 2025, with the latest weight structure shown in the table. As the SARB provides disaggregated consumer price indices for some goods and services categories, the weights of these subcategories may not add to the totals due to more decimals used by the SARB during aggregation.³ According to the updated COICOP 18 classification applied by Stats SA. Some historical data are not available.⁴ Seasonally adjusted by the South African Reserve Bank.⁵ The consumer price index for all urban areas, based on the COICOP 18 classification and published by Stats SA from January 2025 onwards, was statistically linked to the historical consumer price index for urban areas, which was based on the 1999 COICOP classification that Stats SA discontinued after December 2024. Similarly, the consumer price index for all urban areas, based on the COICOP classification and published by Stats SA from January 2008 onwards, was statistically linked to the historical consumer price index for metropolitan areas, which was based on the ITC classification that Stats SA discontinued after December 2007.

1 Source: Statistics South Africa (Stats SA). Published according to the updated COICOP 18 classification.

2 Weights based on expenditure patterns in the 2022/23 *Income and Expenditure Survey (IES)* were applied to data from January 2025, with the latest weight structure shown in the table. As the SARB provides disaggregated consumer price indices for some goods and services categories, the weights of these subcategories may not add to the totals due to more decimals used by the SARB during aggregation.

3 According to the updated COICOP 18 classification applied by Stats SA. Some historical data are not available.

4 Seasonally adjusted by the South African Reserve Bank.

5 The consumer price index for all urban areas, based on the COICOP 18 classification and published by Stats SA from January 2025 onwards, was statistically linked to the historical consumer price index for urban areas, which was based on the 1999 COICOP classification that Stats SA discontinued after December 2024. Similarly, the consumer price index for all urban areas, based on the COICOP classification and published by Stats SA from January 2008 onwards, was statistically linked to the historical consumer price index for metropolitan areas, which was based on the ITC classification that Stats SA discontinued after December 2007.

2 Weights of final manufactured goods do not add up, as non-metallic mineral products (2.88) and furniture and other manufacturing (4.27) are omitted.

3 Weights are at industry level, based on 2020 value-added in the national accounts and will be updated each year from the national accounts data.

4 Seasonally adjusted by the South African Reserve Bank.

1 Compared with the preceding period. Quarterly changes at seasonally adjusted annualised rates.

2 Per cent. Source: Statistics South Africa (Stats SA), *Quarterly Labour Force Survey*.

3 Seasonally adjusted by the South African Reserve Bank.

4 Compared with the same period in the previous year.

5 Deflated by the non-agricultural gross domestic product deflator.

6 From the third quarter of 2002 basic data originate from a new expanded *Survey of Employment and Earnings* and from the fourth quarter of 2004 from the *Quarterly Employment Statistics (QES)* survey by Stats SA. From the second quarters of 2013, and in selected years thereafter, the QES survey was expanded through sample refreshes, resulting in level shifts in certain subsectors. The data were statistically linked to compensate for these structural breaks.

1 Quarterly: Compared with the preceding period. Seasonally adjusted annualised rates (seasonally adjusted by the South African Reserve Bank).

Monthly: Compared with the same month of the previous year.

2 Source: Stats SA. Published according to the updated COICOP 18 classification.

3 An administered price is defined by Stats SA as the price of a product that is deliberately set by an individual producer or group of producers and/or any price that can be determined or influenced by government, either directly or through one of its agencies/institutions, without considering market forces.

4 CPIX for metropolitan and other urban areas up to December 2008. Headline CPI for all urban areas from January 2009 onwards.

5 This is the SARB's preferred measure of core inflation. Up to December 2016, fuel included only petrol. From January 2017, fuel has included petrol and diesel.

6 The consumer price index for all urban areas, based on the COICOP 18 classification and published by Stats SA from January 2025 onwards, was statistically linked to the historical consumer price index for urban areas, which was based on the 1999 COICOP classification that Stats SA discontinued after December 2024. Similarly, the consumer price index for all urban areas, based on the COICOP classification and published by Stats SA from January 2008 onwards, was statistically linked to the historical consumer price index for metropolitan areas, which was based on the ITC classification that Stats SA discontinued after December 2007.
