1 Source: Statistics South Africa (Stats SA). Published according to the updated COICOP 18 classification.

2 Weights based on expenditure patterns in the 2022/23 *Income and Expenditure Survey (IES)* were applied to data from January 2025, with the latest weight structure shown in the table. As the SARB provides disaggregated consumer price indices for some goods and services categories, the weights of these subcategories may not add to the totals due to more decimals used by the SARB during aggregation.

3 According to the updated COICOP 18 classification applied by Stats SA. Some historical data are not available.

4 Seasonally adjusted by the South African Reserve Bank.

5 The consumer price index for all urban areas, based on the COICOP 18 classification and published by Stats SA from January 2025 onwards, was statistically linked to the historical consumer price index for urban areas, which was based on the 1999 COICOP classification that Stats SA discontinued after December 2024. Similarly, the consumer price index for all urban areas, based on the COICOP classification and published by Stats SA from January 2008 onwards, was statistically linked to the historical consumer price index for metropolitan areas, which was based on the ITC classification that Stats SA discontinued after December 2007.

2 Weights based on expenditure patterns in the 2022/23 *Income and Expenditure Survey (IES)* were applied to data from January 2025, with the latest weight structure shown in the table. As the SARB provides disaggregated consumer price indices for some goods and services categories, the weights of these subcategories may not add to the totals due to more decimals used by the SARB during aggregation.

3 According to the updated COICOP 18 classification applied by Stats SA. Some historical data are not available.

4 Seasonally adjusted by the South African Reserve Bank.

5 The consumer price index for all urban areas, based on the COICOP 18 classification and published by Stats SA from January 2025 onwards, was statistically linked to the historical consumer price index for urban areas, which was based on the 1999 COICOP classification that Stats SA discontinued after December 2024. Similarly, the consumer price index for all urban areas, based on the COICOP classification and published by Stats SA from January 2008 onwards, was statistically linked to the historical consumer price index for metropolitan areas, which was based on the ITC classification that Stats SA discontinued after December 2007.

1 Compared with the preceding period. Quarterly changes at seasonally adjusted annualised rates.

2 Per cent. Source: Statistics South Africa (Stats SA), *Quarterly Labour Force Survey*.

3 Seasonally adjusted by the South African Reserve Bank.

4 Compared with the same period in the previous year.

5 Deflated by the non-agricultural gross domestic product deflator.

6 From the third quarter of 2002 basic data originate from a new expanded Survey of Employment and Earnings and from the fourth quarter of 2004 from the *Quarterly Employment Statistics* (QES) survey by Stats SA. From the second quarters of 2013, and in selected years thereafter, the QES survey was expanded through sample refreshes, resulting in level shifts in certain subsectors. The data were statistically linked to compensate for these structural breaks.
