¹ Before April 2000 the basis of reporting revenue and expenditure was bank statement transactions, whereas the current reporting relies on cash book transactions as reported in the *Statement of National Government's Revenue, Expenditure and Borrowing* and is therefore not strictly comparable with data prior to April 2000. Total revenue includes amounts in transit before April 2000.

² Compared with the corresponding period of the preceding fiscal year.

³ The information on this page is an analysis of the National Revenue Fund.

⁴ Sales duty is included before 1983 and general sales tax before October 1991.

⁵ Compared with the actual outcome of previous fiscal years.

1 The deficit/surplus recalculated by excluding interest payments from total expenditure.

2 As at end of the period.

3 Companies include corporations and other enterprises. Including secondary tax on companies and tax on retirement funds.

4 Including other taxes on income and profits not divisible between individuals and companies.

5 Taxes on property are taxes payable on the use, ownership or transfer of wealth. From 1 April 2019, this series was revised to exclude taxes on financial and capital transactions (security transfer tax, demutualisation levy and transfer duties), which are now included as part of taxes on goods and services.

6 Sales duty is included before 1983 and general sales tax before October 1991.

1 Compared with the preceding period. Quarterly changes at seasonally adjusted annualised rates.

2 Per cent. Source: Statistics South Africa (Stats SA), *Quarterly Labour Force Survey*

3 Seasonally adjusted by the South Africa Reserve Bank (SARB).

4 Compared with the same period in the previous year.

5 Deflated by the non-agricultural gross domestic product deflator.

6 From the third quarter of 2002 basic data originate from a new expanded *Survey of Employment and Earnings* and from the fourth quarter of 2004 from the *Quarterly Employment Statistics (QES)* survey by Stats SA. From the second quarters of 2013, and in selected years thereafter, the QES survey was expanded through sample refreshes, resulting in level shifts in certain subsectors. The data were statistically linked to compensate for these structural breaks.

1 Quarterly: Compared with the preceding period. Seasonally adjusted annualised rates (seasonally adjusted by the SARB).

Monthly: Compared with the same month of the previous year.

2 Source: Stats SA. Published according to the updated COICOP 18 classification.

3 An administered price is defined by Stats SA as the price of a product that is deliberately set by an individual producer or group of producers and/or any price that can be determined or influenced by government, either directly or through one of its agencies/institutions, without considering market forces.

4 CPIX for metropolitan and other urban areas up to December 2008. Headline CPI for all urban areas from January 2009 onwards.

5 This is the SARB's preferred measure of core inflation. Up to December 2016, fuel included only petrol. From January 2017, fuel has included petrol and diesel.

6 The consumer price index for all urban areas, based on the COICOP 18 classification and published by Stats SA from January 2025 onwards, was statistically linked to the historical consumer price index for urban areas, which was based on the 1999 COICOP classification that Stats SA discontinued after December 2024. Similarly, the consumer price index for all urban areas, based on the COICOP classification and published by Stats SA from January 2008 onwards, was statistically linked to the historical consumer price index for metropolitan areas, which was based on the ITC classification that Stats SA discontinued after December 2007.
