A = annual figures, Q = quarterly figures.

... denotes not available.

0 denotes a value between nil and half of the measuring unit.

Algemene opmerkings

* Jaarlikse data behalwe waar anders aangedui.

J = jaarliks, K = kwartaalliks.

... dui aan nie beskikbaar nie.

0 dui aan 'n waarde tussen nul en die helfte van die meeteenheid.

South Africa's national accounts, 1946 - 1993

Introduction

This supplement to the *Quarterly Bulletin* provides revised information on the national accounts of South Africa for the period 1946 to 1993. Comprehensive revisions had to be made to the national accounts in order to incorporate new data that have become available, to reclassify certain undertakings and to rebase estimates at constant prices. This is the fifth time that revisions of this kind have been made in South Africa. The current comprehensive revision updates and extends national accounts estimates for the years 1946 to 1990 as they were published in a supplement to the *Quarterly Bulletin* of June 1991.

In comprehensive revisions the following kinds of changes are usually made:

- definitional and classificational changes, which update the accounts in order to keep abreast of developments in the South African economy;
- statistical changes, which reflect a shift in the base period for the calculation of constant-price estimates and the associated price indices, revised sources of data and improved estimating procedures; and
- the redesigning of tables to include or omit series that reflect the definitional and classificational changes or make the tables more informative.

Comprehensive revisions therefore differ from the regular annual national accounts revisions in the scope of the changes that are being effected and the length of the period to which the revisions apply. In the current comprehensive revision, the definitional and classificational changes had to be made because of the privatisation and commercialisation of public corporations and business enterprises of general government. Statistical procedures were adjusted insofar as it was necessary to allow for the incorporation of newly available data sources and new as well as revised data contained in familiar and often-used sources of statistical information.

The current revisions draw upon information from all the relevant censuses released between 1987 and 1993, income and expenditure surveys of households in different regions, and the results of the population census of 1991 (after allowing for under-counting). In some cases the methods of calculation had to be changed in view of problems encountered with the availability and reliability of data sources. New information on unrecorded and informal economic activities has also been included in the revised national accounts statistics.

The purpose and background of rebasing

National accounts data at constant prices are constructed to measure changes in the volume or quality of goods and services produced or utilised. The

statistical procedure for measuring volume changes in a macro-economic aggregate between a chosen base period and the current period, consists of revaluing the aggregate in question in the current period at the prices of the base period and then to calculate the change between these two periods. This procedure eliminates the effects of price changes from the base period to the current period by recalculating the value of aggregate output and expenditure in terms of the prices of goods and services in the base period. The prices in the selected base period are therefore a factor in determining the real values of the different goods and services that are included in total output and expenditure in the other periods.

Relative values change over time because prices do not usually rise or decline at the same rate from one period to another. Reasons for shifts in relative prices include changes in supply and demand, different rates of change in productivity in different industries, changes in the quality of products, technological advances, tax changes, international price movements and exchange rate adjustments. To ensure that relative values, and therefore weighted average volume changes, approximate the current structure of the economy as closely as possible, base periods and weights have to be changed from time to time. The United Nations suggests in the revised *System of National Accounts* that constant price series should not be allowed to run for longer than five or at the most ten years without changing the base year. It is recommended, however, that the base year be changed every five years. For this reason, South Africa's national accounts data at constant prices have been rebased, using 1990 (instead of 1985) as the new base year. The shift in the base year changes the units (rand value) in which output and expenditure volumes are measured, and the difference in the level between the previously published and revised series primarily reflects the difference in the unit of measurement. For example, rebasing from 1985 prices to 1990 prices approximately doubles the level of real gross domestic product, reflecting essentially the increase in the level of prices from 1985 to 1990. It does not indicate a doubling of output or expenditure volumes.

The new constant price series, with 1990 as the base year, have been calculated for the period from 1988 onwards. This allows for changes in the growth rates on account of changes in the weighting structure, while ensuring at the same time that the weights used in the measurement of changes in real national accounts aggregates between 1985 and 1990 reflect the relevant price and quantity structure for this period reasonably closely. Previously estimated series expressed in terms of constant 1985 prices have been retained for the period

up to 1988 and have been linked to the new series without being re-weighted.

In order not to disturb the previously existing rates of change in volume series up to 1988, subtotals and totals have been converted to 1990 prices, independently of their components. As a result, these converted subtotals and totals for periods before 1988 are not equal to the sums of their components. This means that the constant price figures do not "add up" in an accounting sense.

Revisions

During the current revision of the national accounts statistics, the Economics Department of the Reserve Bank co-operated closely with the Central Statistical Service and the Department of Agriculture. The Central Statistical Service and the Bank jointly concentrated on estimating the gross domestic product at current and constant prices and certain components of private consumption expenditure, while the Department of Agriculture was mainly responsible for estimating output in the agricultural sector and private consumption expenditure on food, beverages and tobacco at current and constant prices. In addition, the Bank assumed responsibility for the revision of the other major components of gross domestic expenditure at current and constant prices, as well as for the compilation of a full set of national and sectoral accounts for the Republic of South Africa.

Major revisions to earlier estimates of national accounts aggregates at current prices and at constant prices were made for the period from 1988. Only minor adjustments to aggregates at nominal values were necessary to smooth series between 1985 and 1988.

Revision of gross domestic product

In the revision of gross domestic product at current prices statistical inputs that had become available from various census reports were used, such as the 1988 census of agriculture, the 1990 census of mining, the 1988 census of manufacturing, the 1988 census of construction and several other similar reports. Value added in the services sectors was adjusted in view of new information available on the remuneration of domestic workers and revised valuations of imputed rent for owner-occupied dwellings.

Measured growth in the revised estimates of real gross domestic product deviates somewhat from the previously published growth rates. For example, the growth rates of real output by the agricultural sector of 2, -25 and 17½ per cent for 1991 to 1993 were changed to 4½, -27½ and 21½ per cent, respectively. In the manufacturing sector the growth rates of -1½ and -2½ per cent for 1990 and 1991, were revised downwards to -2½ and -4½ per cent. These more sizable revisions in the rate of change in the real output of the manufacturing sector were brought about by the change in the weighting structure and the new method of calculation

applied by the Central Statistical Service. Instead of extrapolating base-year estimates by means of an index of the volume of manufacturing output, the Central Statistical Service now uses indices of the real value of sales by manufacturing institutions. The changes in the growth rates of the various sectors of economic activity partially offset each other and noticeable changes in the growth rate of total gross domestic product at market prices occurred only in 1991. In this year the previously estimated decline of ½ per cent was revised downwards to 1 per cent.

The effects on the average annual real growth rates of the rebasing and the revisions for 1988-1993 are presented in Table 1. For the primary sector the average annual real growth rate improved from a negative growth

Table 1

Percentage change in gross domestic product by kind of economic activity, 1988 to 1993

	Compound annual rates at 1985 prices	Compound annual rates at 1990 prices
Primary sector.....	-0,5	-0,1
Agriculture, forestry and fishing ..	-1,2	-0,4
Mining and quarrying.....	-0,2	0,0
Secondary sector.....	-0,8	-1,3
Manufacturing	-1,2	-1,9
Electricity, gas and water	2,0	2,3
Construction.....	-2,1	-1,8

Wholesale and retail trade, catering and accommodation ..	-0,3	-0,6
Transport, storage and com- munication.....	1,0	1,3
Finance, insurance, real estate and business services	0,9	0,9
Community, social and personal services	1,5	1,5
Less: Imputed financial services charges	1,9	2,2
General government.....	1,0	1,6
Other producers.....	1,1	1,1
Gross domestic product at factor cost.....	0,0	-0,1
Indirect taxes net of subsidies ..	1,1	0,8
Gross domestic product at market prices GDP(O)¹	0,1	0,0

¹ Gross domestic product on output base, i.e. total volume of production.

rate of ½ per cent to almost no growth. This could be attributed to an upward revision of real output towards the end of the period in both the agricultural and the mining sector. Negative real growth in the secondary sector increased from an average level of nearly 1 per cent to almost 1½ per cent. A change in the average real growth recorded by the manufacturing sector from -1 per cent to nearly -2 per cent was not fully offset by an increase from 2 to nearly 2½ per cent in the growth recorded by the sector supplying electricity, gas and water. In the services sector the estimated annual real growth between 1988 and 1993 remained more or less unchanged. This could mainly be attributed to an increase in the negative growth rate attained by the sector commerce, which was largely neutralised by increases from 1 per cent to approximately 1½ per cent in the annual growth rates of both the transport sector and general government during this period. In general, the growth rates of all other subsectors were not affected significantly by the revisions.

The informal sector

The informal sector may be broadly defined as consisting of economic units engaged in the production of goods and services for own account in a "casual" organisation structure. These units normally operate on a small scale and with little or no division between labour and capital as factors of production.

For statistical purposes, the informal sector is regarded as a group of production units which, according to the definitions and classifications provided in the United Nations *System of National Accounts*, form part of the household sector as household enterprises or, equivalently, unincorporated enterprises owned by households.

In South Africa the abolition of influx control and the repeal of several other regulatory measures since 1986 prepared the way for many new initiatives in the informal economy. The emergence of the informal sector necessitated the incorporation of this segment of the economy into the official national accounts aggregates. Previously only certain elements of informal activity, particularly in the agricultural and the private transport sector, were accounted for in the official gross domestic product statistics. The presumed growth of informal economic activity since the middle of the 1980s made it necessary to include also the value added of the rest of the informal economy in the official figures. The net result was an upward adjustment of about 5½ per cent in the level of the revised estimates of aggregated nominal factor income at market prices to fully account for informal economic activity.

Data serving as the basis for the estimates of the value added by the informal sector came from a revised household survey conducted by the Central Statistical Service in October 1993. This survey focused on the activities of the informal economy, but is not comparable with similar surveys conducted in 1989 and 1990. The growth in the informal sector cannot, therefore, be evaluated properly. From 1995 the survey of household

activities in the informal sector will be repeated annually, which should make it possible to determine the growth in informal economic activity.

Revision of the components of gross domestic expenditure

Revisions of the components of gross domestic expenditure were made possible by the results of several surveys of household expenditure, a detailed analysis of certain components of private consumption expenditure, a thorough investigation of the income and expenditure of general government at all levels, and the incorporation of new information on gross domestic fixed investment and the book value of inventories contained in the recent census reports of mining, manufacturing and construction.

Revised estimates of private consumption expenditure were based on data obtained from:

- the survey of household expenditure, undertaken by the Human Sciences Research Council in 1990 among all population groups;
- the income and expenditure surveys of households in the former TBVC countries conducted by the Bureau of Market Research of the University of South Africa and the Human Sciences Research Council;
- the 1991 income and expenditure patterns of white and black households in non-metropolitan towns in South Africa, determined by the Bureau of Market Research; and
- a study by the Bureau of Market Research in 1993 with the objective of calculating household expenditure by all population groups in South Africa, including the former TBVC countries and self-governing national states.

By merging all these results with the Reserve Bank's own estimates of households' expenditure on consumer goods and services in the non-metropolitan areas and by multiplying the average expenditure per household by the number of households in these areas, an estimate of aggregate private consumption expenditure was obtained.

All sub-categories of private consumption expenditure were revised. However, the extent of the revisions varied from small to substantial changes made to the original estimates. Major revisions were made to spending categories such as food, beverages, tobacco, rent and medical care.

In the period 1988 to 1993 (see Table 2) the average annual growth in real outlays on private consumption expenditure remained unchanged at about ½ per cent. The small increase of nearly ½ per cent in 1991 was revised downwards to a decrease of ½ per cent, whereas the decline of 2½ per cent in 1992 was revised upwards to a decrease that amounted to 1½ per cent.

The calculated consumption expenditure by general government was improved with more recent information now available on the current expenditure by the former TBVC countries, self-governing national

states and local authorities. The estimated outlays by provincial administration were also revised upwards in 1993.

In the period 1988 to 1993 the revised average annual growth in real outlays by general government shows little change compared with the growth previously reported (see Table 2). However, the rate of increase in this aggregate in 1991 was revised downwards from 5 per cent to 2 per cent, while the small increases of ½ per cent registered in both 1992 and 1993 were revised upwards to 1½ per cent in both these years.

Table 2

Percentage change in components of gross domestic expenditure and gross domestic product aggregates, 1988 to 1993

	Compound annual rates at 1985 prices	Compound annual rates at 1990 prices
Private consumption expenditure	0,6	0,7
Consumption expenditure by general government	2,4	2,2
Gross domestic fixed investment	-3,9	-2,6
Change in inventories ¹	-0,7	-0,7
Gross domestic expenditure.	-0,5	-0,5
Exports of goods and non- factor services	2,5	2,7
Imports of goods and non- factor services	1,1	1,2
Expenditure on gross domestic product GDP(E) at market prices²	0,5	0,6
GDP(O) at market prices³	0,1	0,0
GDP(I) at market prices⁴	0,2	0,7
GDP(A) at market prices⁵	0,3	0,4

¹ Change in the series as percentage of the GDP(O) at the beginning of the period.

² Gross domestic product on expenditure base, i.e. the total of consumption expenditure, gross domestic investment, export of goods and non-factor services *minus* imports of goods and non-factor services.

³ Gross domestic product on output base, i.e. total volume of production.

⁴ Gross domestic product on income base, i.e. the sum of factor incomes at current prices deflated by the implied deflator for GDP(E).

⁵ Average measure of gross domestic product, i.e. average of GDP(E), GDP(O) and GDP(I).

The revised estimates of gross domestic fixed investment and inventory investment reflect the incorporation of new information obtained from the censuses of agriculture, mining, manufacturing and construction. The report of 1989 on building plans passed and buildings completed, up-to-date information received from the public corporations and more comprehensive information on investment expenditure by local authorities, were all taken into account when the investment estimates were finalised.

Real outlays on gross domestic fixed investment were revised upwards and in the period 1988 to 1993 the average annual rate of decline was estimated at 2½ per cent instead of 4 per cent (see Table 2). This could mainly be attributed to the fact that negative growth rates of 8½ and 10 per cent recorded in 1991 and 1992 were revised to 7½ and 6 per cent. The negative growth of 4 per cent in 1993 was revised to 3 per cent. Revised estimates of changes in real investment in inventories as a percentage of gross domestic product remained unchanged at -½ per cent in the period 1988 to 1993.

Revision of the capital financing account

The revised estimates of income and expenditure caused changes in the overall level of saving, but the previously determined broad tendencies in savings ratios over time were essentially left unaltered by the revisions. However, the reclassification of business enterprises of general government as public corporations and adjustments to the transfer payments from general government to households from the middle of 1991, resulted in a substantial increase in dissaving by the general government, with corresponding increases in net saving by the corporate sector and households.

Classification of public corporations and business enterprises of general government

Institutional adjustments were effected on account of the classification of Sasol III and Alusaf as private business enterprises instead of as public corporations. The reclassification of Transnet, Telkom and the South African Post Office from general government business enterprises to public corporations was also effected during the current revisions. Although the status of these concerns had changed earlier, their reclassification was delayed in order to coincide with the wide-ranging revisions of the national accounts. The individual time series of the different institutional sectors concerned show major changes at the time when the reclassifications became effective in 1990 and 1992.

Suid-Afrika se nasionale rekeninge, 1946-1993

Inleiding

Hierdie bylaag tot die *Kwartaalblad* bevat hersiene gegewens van die nasionale rekeninge van Suid-Afrika vir die tydperk 1946-1993. Omvangryke hersienings aan die nasionale rekeninge was noodsaaklik om nuwe gegewens wat beskikbaar gekom het in berekening te bring, om 'n herindeling van sekere ondernemings te doen en om ramings teen konstante pryse te herbaseer. Dit is nou die vyfde keer dat hersienings op hierdie wyse in Suid-Afrika gedoen is. Die jongste omvattende hersienings is 'n bywerking en uitbreiding van die ramings ten opsigte van die nasionale rekeninge vir die jare 1946 tot 1990 wat in 'n bylaag tot die *Kwartaalblad* van Junie 1991 gepubliseer is.

In omvattende hersienings word die volgende soorte veranderings gewoonlik aangebring:

- veranderings in definisies en indelings wat die rekeninge bywerk om met die ontwikkelings in die Suid-Afrikaanse ekonomie tred te hou;
- statistiese veranderings wat 'n weerspieëling is van die verskuiwing in die basistydperk vir die berekening van ramings teen konstante pryse en die gepaardgaande prysindekse, hersiene inligtingsbronne en verbeterde ramingsmetodes; en
- die herontwerp van tabelle om reekse wat veranderings in definisies en indelings weerspieël, in te sluit of weg te laat, of om die tabelle meer insiggewend te maak.

Omvattende hersienings verskil derhalwe van die gereelde jaarlikse hersienings aan die nasionale rekeninge ten opsigte van die omvang van die veranderings en die lengte van die tydperk waarvoor hersienings gemaak word. In die huidige omvattende hersienings moes veranderings aan definisies en indelings as gevolg van die privatisering en kommersialisering van die openbare korporasies en sakeondernemings van die algemene owerheid gedoen word. Statistiese metodes is aangepas in soverre dit nodig was om voorsiening te maak vir die insluiting van nuwe databronne wat beskikbaar gekom het en nuwe sowel as hersiene gegewens wat uit bekende en gereelde bronne van statistiese gegewens verkry word.

Die huidige hersienings het gebruik gemaak van gegewens uit alle toepaslike sensusse wat tussen 1987 en 1993 beskikbaar gestel is, inkomste- en bestedingsopnames van huishoudings in die verskillende streke en die resultate van die bevolkingsensus van 1991 (nadat voorsiening vir ondertelling gemaak is). In sommige gevalle moes die metodes van berekening verander word as gevolg van probleme wat met die beskikbaarheid en betroubaarheid van inligtingsbronne ondervind is. Nuwe inligting oor onaangetekende en informele ekonomiese

bedrywighede is ook by die gewysigde nasionale-rekeninge-gegewens ingesluit.

Die doel en agtergrond van die herbasering

Die doel met die samestelling van die gegewens oor die nasionale rekeninge teen konstante pryse is om die veranderings te meet in die hoeveelheid of gehalte van goedere en dienste wat geproduseer of aangewend word. Die statistiese metode om die veranderings in die fisiese omvang van makro-ekonomiese totale tussen 'n gekose basisjaartydperk en die huidige tydperk te meet, behels die herberekening van die betrokke totale in die huidige tydperk teen die pryse van die basistydperk en om daarna die verandering tussen hierdie twee tydperke te bereken. Hierdie metode skakel die invloed van prysveranderings van die basistydperk tot die huidige tydperk uit deur die waarde van totale produksie en besteding volgens die pryse van goedere en dienste in die basistydperk te bereken. Die pryse in die gekose basistydperk is dus 'n faktor wat in berekening gebring word by die bepaling van die reële waardes van die verskillende goedere en dienste wat deel is van die totale produksie en besteding in die ander tydperke.

Relatiewe waardes verander met verloop van tyd aangesien pryse nie gewoonlik van een tydperk tot die volgende teen dieselfde koers styg of daal nie. Redes vir die wisseling in relatiewe pryse sluit in veranderings in die vraag en aanbod, verskille in die koerse van verandering in produktiwiteit in verskillende nywerhede, veranderings in die gehalte van produkte, tegnologiese vooruitgang, belastingveranderings, internasionale prysveranderings en wisselkoersaanpassings. Om te verseker dat relatiewe waardes, en derhalwe die geweegde gemiddelde veranderings in hoeveelhede, die huidige struktuur van die ekonomie so getrou moontlik weerspieël, moet basistydperke en gewigte van tyd tot tyd aangepas word. Die Verenigde Nasies stel in die gewysigde *System of National Accounts* voor dat reekse teen konstante pryse nie toegelaat moet word om vir langer as vyf jaar, of op die meeste tien jaar, sonder 'n verandering in die basisjaar gebruik te word nie. Daar word egter aanbeveel dat die basisjaar verkieslik elke vyf jaar verander moet word. Suid-Afrika se nasionalerekeninge-gegewens teen konstante pryse is gevolglik herbaseer deur 1990 (in plaas van 1985) as die nuwe basisjaar te gebruik.

Die verskuiwing in die basisjaar verander die eenhede (randwaarde) waarin die hoeveelheid produksie en besteding gemeet word, en die verskil in die vlakke van die vorige gepubliseerde en die huidige gewysigde reekse weerspieël hoofsaaklik die verskil in die metingseenheid. Die herbasering van 1985-pryse na 1990-pryse het byvoorbeeld die vlak van die bruto binnelandse produk ongeveer verdubbel, wat hoofsaaklik

die toename in die vlak van die pryse van 1985 tot 1990 weerspieël het. Dit dui nie op 'n verdubbeling in die hoeveelheid produksie of besteding nie.

Die berekening van die nuwe reekse teen konstante pryse met 1990 as basisjaar is vir die tydperk sedert 1988 gedoen. Dit het veranderinge in die groeikoerse op grond van die veranderinge in die gewigstruktuur veroorsaak, maar terselfdertyd verseker dat die gewigte wat vir die berekening van veranderinge in die reële nasionalerekening-totale tussen 1985 en 1990 gebruik is, die werklike prys- en hoeveelheidstrukture vir hierdie tydperk so getrou moontlik weerspieël het. Bestaande reekse wat volgens konstante 1985-pryse bereken is, is vir die tydperk tot en met 1988 behou en aan die nuwe reekse verbind sonder om die gewigte te verander.

Ten einde die koerse van verandering in die reekse teen konstante pryse wat tot 1988 bestaan het, nie te versteur nie, is subtotale en totale onafhanklik van hul komponente na 1990-pryse omgeskakel. As gevolg hiervan is hierdie omgeskakelde subtotale en totale vir die tydperke voor 1988 nie gelyk aan die somtotaal van hul komponente nie. Met ander woorde, die waardes teen konstante pryse "tel nie op" in 'n rekenkundige sin nie.

Hersienings

Gedurende die huidige hersiening van die nasionalerekening-statistiek het die Departement Ekonomie van die Reserwebank, die Sentrale Statistiekdiens en die Departement van Landbou ten nouste saamgewerk. Die Sentrale Statistiekdiens en die Bank het hul toegespits op die ramings van die bruto binnelandse produk teen heersende en konstante pryse en sekere komponente van private verbruiksbesteding, terwyl die Departement van Landbou hoofsaaklik vir die ramings van die produksie in die landbousektor en die private verbruiksbesteding aan voedsel, drank en tabak teen heersende en konstante pryse verantwoordelik was. Verder het die Bank die verantwoordelikheid aanvaar vir die hersiening van al die ander hoofkomponente van die bruto binnelandse besteding teen heersende en konstante pryse, sowel as vir die samestelling van die volledige stel nasionale en sektorale rekeninge vir die Republiek van Suid-Afrika.

Omvattende wysigings van die vroeëre ramings van die nasionalerekening-totale teen heersende en konstante pryse is vir die tydperk sedert 1988 gedoen. Slegs geringe aanpassings aan totale teen heersende waardes was nodig om die reekse tussen 1985 en 1988 te verbind.

Hersiening van die bruto binnelandse produk

In die hersiening van die bruto binnelandse produk teen heersende pryse is statistiese gegewens uit verskeie sensusverslae verkry, soos die landbou-sensus van 1988, die mynwese-sensus van 1990, die fabriekswese-sensus van 1988, die konstruksiewese-sensus van 1988 en ander soortgelyke verslae. Die toegevoegde waarde in die dienstesektore is aangepas as gevolg van nuwe

inligting wat beskikbaar gekom het oor die vergoeding van huiswerkers en hersiene ramings van die toegerekende huurwaarde van huise wat deur hul eienaars bewoon word.

Die waargenome groei in die hersiene ramings van die reële bruto binnelandse produk wyk ietwat af van die groeikoerse wat voorheen vrygestel is. Die groeikoerse van die reële produksie in die landbousektor is byvoorbeeld van 2, -25 en 17½ persent vir 1991 tot 1993 tot onderskeidelik 4½, -27½ en 21½ persent verander. In die fabriekswesesektor is die groeikoerse van -1½ en -2½ persent vir 1990 en 1991 afwaarts tot -2½ en -4½ persent hersien. Die betekenisvolle hersienings in die koerse van verandering in die reële produksie van die fabrieks-

Tabel 1

Persentasieverandering in die bruto binnelandse produk volgens tipe ekonomiese bedrywigheid, 1988 tot 1993

	Saamgestelde jaarkoerse teen 1985- pryse	Saamgestelde jaarkoerse teen 1990- pryse
Primêre sektor	-0,5	-0,1

Ander produsente	1,1	1,1
Bruto binnelandse produk teen faktorkoste	0,0	-0,1
Indirekte belastings min subsidies	1,1	0,8
Bruto binnelandse produk teen markpryse BBP(P)¹	0,1	0,0

¹ Bruto binnelandse produk volgens die produksiemetode, dit wil sê totale hoeveelheid produksie.

wesesektor is teweeggebring deur die verandering aan die gewigstruktuur en die nuwe berekeningsmetode wat deur die Sentrale Statistiekdiens toegepas word. In plaas van die ekstrapolering van basisjaar-ramings met behulp van 'n indeks van die fisiese hoeveelhede van fabrieksproduksie, gebruik die Sentrale Statistiekdiens nou indekse van die reële waarde van verkope deur vervaardigingsondernemings. Die veranderinge in die groeikoerse van die verskillende sektore se ekonomiese bedrywigheid het mekaar onderling geneutraliseer en betekenisvolle veranderinge in die groeikoerse van die totale bruto binnelandse produk teen markpryse het slegs in 1991 voorgekom. In daardie jaar is die vorige geraamde daling van ½ persent afwaarts tot 1 persent hersien.

Die uitwerking van die herbasing en hersienings op die gemiddelde jaarlikse groeikoerse vir 1988-1993 word in tabel 1 weergegee. In die primêre sektor het die gemiddelde jaarlikse reële groeikoerse verbeter van 'n negatiewe groeikoerse van ½ persent tot feitlik geen groei nie. Dit kon aan die opwaartse hersiening van die reële produksie in sowel die landbou- as die mynbousektore aan die einde van die tydperk toegeskryf word. Die negatiewe reële groei in die sekondêre sektor het van 'n gemiddelde vlak van bykans 1 persent tot feitlik 1½ persent toegeneem. 'n Verandering in die gemiddelde reële groei van -1 na -2 persent in die fabriekswese is nie ten volle deur die toename van 2 tot bykans 2½ persent in die groei van die sektor verantwoordelik vir die voorsiening van elektrisiteit, gas en water, teengewerk nie. In die dienstesektor het die beraamde jaarlikse groeikoerse tussen 1988 en 1993 min of meer onveranderd gebly. Dit kan hoofsaaklik toegeskryf word aan 'n toename in die negatiewe groeikoerse deur die handelssektor, wat grotendeels geneutraliseer is deur toenames van 1 persent tot ongeveer 1½ persent gedurende hierdie tydperk in die jaarlikse groeikoerse van sowel die vervoersektor as die algemene owerheid. In die algemeen is die groeikoerse van al die ander subsektore nie wesenlik deur die hersienings beïnvloed nie.

Die informele sektor

Die informele sektor kan in die breë sin gedefinieer word as ekonomiese eenhede wat goedere en dienste vir eie rekening binne 'n baie losse organisasiestruktuur produseer. Hierdie eenhede doen normaalweg sake op 'n klein skaal en daar bestaan min of geen verdeling tussen die produksiefaktore arbeid en kapitaal nie.

Vir statistiese doeleindes word die informele sektor beskou as 'n groep produksie-eenhede wat volgens die definisies en indelings van die Verenigde Nasies se *System of National Accounts* deel uitmaak van die huishoudingsektor as sakeondernemings van huishoudings of as nie-geïnkorporeerde sakeondernemings wat deur huishoudings besit word.

In Suid-Afrika het die afskaffing van instromingsbeheer en die opheffing van verskeie regulerende maatreëls sedert 1986 die weg gebaan vir baie nuwe inisiatiewe in die informele ekonomie. Die toenemende

belangrikheid van die informele sektor het ook die insluiting van hierdie deel van die ekonomie by die amptelike nasionalerekening-totale genoodsaak. Voorheen is slegs sekere dele van die informele bedrywigheede, veral in die landbou en in die private vervoersektor, by gegewens van die amptelike bruto binnelandse produk in berekening gebring. Met die waarskynlike groei van informele ekonomiese bedrywigheede sedert die middel tagtigerjare het dit noodsaaklik geword om ook die toegevoegde waarde van die res van die informele ekonomie by die amptelike syfers in te sluit. Gevolglik is 'n opwaartse aanpassing van ongeveer 5½ persent in die vlak van die gewysigde ramings van die totale nominale faktorinkome teen markpryse gemaak om die informele ekonomiese bedrywigheid ten volle in berekening te bring.

Gegewens wat as grondslag gedien het vir die ramings van die toegevoegde waarde deur die informele sektor is verkry uit 'n hersiene opname van huishoudings wat in Oktober 1993 deur die Sentrale Statistiekdiens opgeneem is. Hierdie opname het die aandag op die bedrywigheede van die informele sektor toegespits, maar is nie vergelykbaar met soortgelyke opnames van 1989 en 1990 nie. Die groei in die informele sektor kan derhalwe nie behoorlik ontleed word nie. Vanaf 1995 sal die opname van huishoudings se bedrywigheede in die informele sektor jaarliks herhaal word, wat die bepaling van die groei in die informele ekonomiese bedrywigheede moontlik sal maak.

Hersiening van die komponente van bruto binnelandse besteding

Hersienings van die komponente van die bruto binnelandse besteding is moontlik gemaak deur die resultate van verskeie opnames van die uitgawes van huishoudings, 'n omvattende ontleding van sekere komponente van private verbruiksbesteding, 'n deeglike ondersoek na die inkomste en uitgawes van die algemene owerheid op alle vlakke en die insluiting van nuwe gegewens met betrekking tot die bruto binnelandse vaste investering en die boekwaarde van voorrade wat in die jongste sensusverslae van die mynbou, fabriekswese en konstruksiebedryf vervat is.

Hersiene ramings van die private verbruiksbesteding is gegrond op gegewens wat verkry is uit:

- die opname van die uitgawes van huishoudings wat gedurende 1990 deur die Raad vir Geesteswetenskaplike Navorsing onder alle bevolkingsgroepe gedoen is;
- die opnames van die inkomste en uitgawes van huishoudings in die voormalige TBVC-lande wat deur die Buro vir Marknavorsing van die Universiteit van Suid-Afrika en die Raad vir Geesteswetenskaplike Navorsing gedoen is;
- die inkomste- en uitgawepatrone gedurende 1991 van wit en swart huishoudings in die nie-metropolitaanse dorpe in Suid-Afrika wat deur die Buro vir Marknavorsing vasgestel is; en
- 'n studie deur die Buro vir Marknavorsing in 1993 met

die doel om die uitgawes van huishoudings onder alle bevolkingsgroepe in Suid-Afrika te bereken, met inbegrip van die voormalige TBVC-lande en selfregerende nasionale state.

Deur 'n samevoeging van al hierdie resultate met die Reserwebank se eie ramings van die huishoudings se besteding aan verbruiksgoedere en -dienste in die nie-metropolitaanse gebiede en deur die gemiddelde uitgawe per huishouding te vermenigvuldig met die aantal huishoudings in hierdie gebiede, is 'n raming van die totale private verbruiksbesteding verkry.

Tabel 2

Persentasieverandering in die komponente van die bruto binnelandse besteding en die totale van die bruto binnelandse produk, 1988 tot 1993

	Saamge- stelde jaarkoerse teen 1985- pryse	Saamge- stelde jaarkoerse teen 1990- pryse
Private verbruiksbesteding	0,6	0,7
Verbruiksbesteding deur die algemene owerheid.....	2,4	2,2
Bruto binnelandse vaste inves- tering	-3,9	-2,6
Verandering in voorrade ¹	-0,7	-0,7
Bruto binnelandse besteding	-0,5	-0,5
Uitvoer van goedere en nie- faktordienste.....	2,5	2,7
Invoer van goedere en nie- faktordienste.....	1,1	1,2
Besteding aan bruto binne- landse produk BBP(B) teen markpryse².....	0,5	0,6
BBP(P) teen markpryse³	0,1	0,0
BBP(I) teen markpryse⁴.....	0,2	0,7
BBP(G) teen markpryse⁵.....	0,3	0,4

¹ Verandering in die reeks as persentasie van die BBP(P) aan die begin van die tydperk.

² Bruto binnelandse produk volgens die bestedingsmetode, dit wil sê die totale verbruiksbesteding, bruto binnelandse investering, uitvoere van goedere en nie-faktordienste *min* invoere van goedere en nie-faktordienste.

³ Bruto binnelandse produk volgens die produksiemetode, dit wil sê totale hoeveelheid produksie.

⁴ Bruto binnelandse produk volgens die inkomemetode, dit wil sê die som van die faktorinkome teen heersende pryse gedeleeër met die afgeleide deflator van die BBP(B).

⁵ Gemiddelde waarneming van die BBP, dit wil sê die gemiddelde van die BBP(B), die BBP(P) en die BBP(I).

Alle onderafdelings van die private verbruiksbesteding is hersien. Die omvang van die hersienings van die oorspronklike ramings het egter van geringe tot wesenlike veranderings gewissel. Omvattende wysigings is aan die bestedingsklasse soos voedsel, drank, tabak, huur en mediese versorging gemaak.

In die tydperk van 1988 tot 1993 het die gemiddelde jaarlikse groei in die reële uitgawes aan private verbruiksbesteding onveranderd op ongeveer ½ persent gebly (sien tabel 2). Die klein toename van bykans ½ persent in 1991 is afwaarts hersien tot 'n afname van ½ persent, terwyl die daling van 2½ persent in 1992 opwaarts hersien is tot 'n afname wat 1½ persent bedra het.

Die berekende verbruiksbesteding van die algemene owerheid is aangepas met gegewens oor die lopende uitgawes van die voormalige TBVC-lande, selfregerende nasionale state en plaaslike owerhede wat nou beskikbaar gekom het. Die geraamde uitgawes deur die provinsiale administrasies is ook in 1993 opwaarts hersien.

Die hersiene gemiddelde jaarlikse groei in die reële besteding deur die algemene owerheid in die tydperk 1988 tot 1993 toon min verandering in vergelyking met die groei wat voorheen bereken is nie (sien tabel 2). Die koers van toename in hierdie totaal is in 1991 egter afwaarts van 5 persent tot 2 persent hersien, terwyl die klein toenames van ½ persent wat in 1992 sowel as 1993 aangeteken is, opwaarts tot 1½ persent hersien is.

Die hersiene ramings van die bruto binnelandse vaste investering en voorraadinvestering weerspieël die nuwe gegewens wat uit sensusse van die landbou, mynbou, fabriekswese en die konstruksiebedryf verkry is. Die 1989-verslag oor bouplanne goedgekeur en geboue voltooi, die jongste gegewens wat van openbare korporasies ontvang is en meer volledige gegewens oor kapitaalbesteding deur die plaaslike owerhede is alles in berekening gebring met die finalisering van die ramings van investering.

Die reële uitgawes aan die bruto binnelandse vaste investering is opwaarts hersien en gedurende die tydperk 1988 tot 1993 is die gemiddelde jaarlikse koers van afname op 2½ persent in plaas van 4 persent geraam (sien tabel 2). Dit kan hoofsaaklik daaraan toegeskryf word dat die negatiewe groeiakoerse van 8½ en 10 persent wat in 1991 en 1992 aangeteken is, tot 7½ en 6 persent hersien is. Die negatiewe groei van 4 persent in 1993 is tot 3 persent hersien. Hersiene ramings van die veranderings in die reële investering in voorrade as 'n verhouding van die bruto binnelandse produk het gedurende die tydperk 1988 tot 1993 onveranderd op -½ persent gebly.

Hersiening van die kapitaalfinansieringsrekening

Die hersiene ramings van die inkomste en die uitgawes het veranderings in die algehele vlak van besparing teweeggebring, maar die breë neigings oor tyd in die besparingsverhoudings het in wese onveranderd gebly. Die herindelings van die sakeondernemings van die algemene owerheid na die openbare korporasies en aanpassings sedert die middel van 1991 aan die oor-

dragte van die algemene owerheid na die huishoudings het egter 'n aansienlike toename in die ontsparing van die algemene owerheid tot gevolg gehad, met ooreenstemmende toenames in die besparings van die maatskappysektor en van huishoudings.

Die indeling van die openbare korporasie en sakeondernemings van die algemene owerheid

Institusionele aanpassings is gemaak op grond van die indeling van Sasol III en Alusaf as private sakeondernemings pleks van openbare korporasies. Die herindeling van Transnet, Telkom en die Suid-Afrikaanse Poskantoor van sakeondernemings van die algemene owerheid na openbare korporasies is ook tydens die jongste hersienings gedoen. Hoewel die status van hierdie ondernemings al 'n tyd gelede verander het, is die herindeling daarvan teruggehou om met die omvattende hersienings van die nasionale rekeninge saam te val. Die individuele tydreeks van die verskillende betrokke institusionele sektore toon groot veranderings in die tydperk 1990 en 1992, toe die herindelings van krag geword het.

* Gegewens vir die laaste vier jaar is voorlopig en onderhevig aan hersiening.

* Data for the last four years are preliminary and subject to revision.

1. Na voorsiening vir waardevermindering en na aansuiwering vir voorraadwaardering.
2. Teen vervangingswaarde.
3. Lopende besteding aan salarisse en lone en aan goedere en ander dienste van 'n nie-kapitale aard van die algemene afdelings, (nie sakeondernemings nie), van openbare owerhede. Openbare owerhede sluit in sentrale owerhede, provinsiale administrasies, plaaslike owerhede en buitelandse grotingsfondse.
4. Na aansuiwering vir voorraadwaardering.

1. After provision for depreciation and after inventory valuation adjustment.
2. At replacement value.
3. Current expenditure on salaries and wages and on goods and other services of a non-capital nature of the general departments, (not business enterprises) of public authorities. Public authorities include central authorities, provincial administrations, local authorities and extra-budgetary funds.
4. After inventory valuation adjustment.

1. Lopende besteding aan salarisse en lone en aan goedere en ander dienste van 'n nie-kapitale aard van die algemene afdelings, (nie sakeondernemings nie), van openbare owerhede. Openbare owerhede sluit in sentrale owerhede, provinsiale administrasie, plaaslike owerhede en buitebegrotingsfondse.

2. Na aansuiwering vir voorraadwaardering.

1. Current expenditure on salaries and wages and on goods and other services of a non-capital nature of the general departments, (not business enterprises), of public authorities. Public authorities include central authorities, provincial administrations, local authorities and extra-budgetary funds.

2. After inventory valuation adjustment.

1. Lopende besteding aan salarisse en lone en aan goedere en ander dienste van 'n nie-kapitale aard van die algemene afdelings, (nie sakeondernemings nie), van openbare owerhede. Openbare owerhede sluit in sentrale owerhede, provinsiale administrasie, plaaslike owerhede en buitebegrotingsfondse.

1. Current expenditure on salaries and wages and on goods and other services of a non-capital nature of the general departments, (not business enterprises), of public authorities. Public authorities include central authorities, provincial administrations, local authorities and extra-budgetary funds.

- Die gegewens in hierdie tabel het betrekking op private huishoudings (insluitende pensioen- en voorsorgfondse en langtermynversekeringsfondse) en private nie-winssoekende instellings (bv. kerke, welsynsorganisasies en sportklubs) wat sosiale en gemeenskapsdienste aan huishoudings lewer.
- Ná aansuiwering vir netto vergoeding aan buitelanders betaal.
- Inkome uit eiendom bestaan uit dividendontvangste; rente-ontvangste verminder met rentebetalinge; huurontvangste verminder met instandhoudingskoste, verbandrente en voorsiening vir waardevermindering; en die winste, verminder met verliese, van nie-geïnkorporeerde sakeondernemings na voorsiening vir waardevermindering en na aansuiwering vir voorraadwaardering.
- Ná voorsiening vir waardevermindering en na aansuiwering vir voorraadwaardering.

- The data in this table refer to private households (including pension and provident funds and long-term insurance funds) and private non-profit institutions (e.g. churches, welfare organisations and sports clubs) that render social and community services to households.
- After adjustment for net remuneration paid to the rest of the world.
- Income from property consists of dividend receipts; interest receipts less interest payments; rent receipts less maintenance cost, mortgage interest and provision for depreciation; and the profits of non-corporate business enterprises after provision for depreciation and after inventory valuation adjustment.
- After provision for depreciation and after inventory valuation adjustment.

- Die gegewens in hierdie tabel het betrekking op private huishoudings (insluitende pensioen- en voorsorgfondse en langtermynversekeringsfondse) en private nie-winssoekende instellings (bv. kerke, welsynsorganisasies en sportklubs) wat sosiale en gemeenskapdienste aan huishoudings lewer.
- Ná aansuiwering vir netto vergoeding aan buitelanders betaal.
- Inkome uit eiendom bestaan uit dividendontvangste; rente-ontvangste verminder met rentebetelings; huurontvangste verminder met instandhoudingskoste, verbandrente en voorsiening vir waardevermindering; en die winste, verminder met verliese, van nie-geïnkorporeerde sakeondernemings ná voorsiening vir waardevermindering en ná aansuiwering vir voorraadwaardering.
- Ná voorsiening vir waardevermindering en ná aansuiwering vir voorraadwaardering.

- The data in this table refer to private households (including pension and provident funds and long-term insurance funds) and private non-profit institutions (e.g. churches, welfare organisations and sports clubs) that render social and community services to households.
- After adjustment for net remuneration paid to the rest of the world.
- Income from property consists of dividend receipts; interest receipts less interest payments; rent receipts less maintenance cost, mortgage interest and provision for depreciation; and the profits of non-corporate business enterprises after provision for depreciation and after inventory valuation adjustment.
- After provision for depreciation and after inventory valuation adjustment.

- Die gegewens in hierdie tabel het betrekking op private huishoudings (insluitende pensioen- en voorsorgfondse en langtermynversekeringsfondse) en private nie-winssoekende instellings (bv. kerke, welsynsorganisasies en sportklubs) wat sosiale en gemeenskapsdienste aan huishoudings lewer.
- Ná aansuiwering vir netto vergoeding aan buitelanders betaal.
- Inkome uit eiendom bestaan uit dividendontvangste; rente-ontvangste verminder met rentebetalings; huurontvangste verminder met instandhoudingskoste, verbandrente en voorsiening vir waardevermindering; en die winste, verminder met verliese, van nie-geïnkorporeerde sakeondernemings na voorsiening vir waardevermindering en ná aansuiwering vir voorraadwaardering.
- Ná voorsiening vir waardevermindering en ná aansuiwering vir voorraadwaardering.

- The data in this table refer to private households (including pension and provident funds and long-term insurance funds) and private non-profit institutions (e.g. churches, welfare organisations and sports clubs) that render social and community services to households.
- After adjustment for net remuneration paid to the rest of the world.
- Income from property consists of dividend receipts; interest receipts less interest payments; rent receipts less maintenance cost, mortgage interest and provision for depreciation; and the profits of non-corporate business enterprises after provision for depreciation and after inventory valuation adjustment.
- After provision for depreciation and after inventory valuation adjustment.

- Die gegewens in hierdie tabel het betrekking op private huishoudings (insluitende pensioen- en voorsorgfondse en langtermynversekeringsfondse) en private nie-winssoekende instellings (bv. kerke, welsynsorganisasies en sportklubs) wat sosiale en gemeenskapsdienste aan huishoudings lewer.
- Ná aansuiwering vir netto vergoeding aan buitelanders betaal.
- Inkome uit eiendom bestaan uit dividendontvangste; rente-ontvangste verminder met rentebetalinge; huurontvangste verminder met instandhoudingskoste, verbandrente en voorsiening vir waardevermindering; en die winste, verminder met verliese, van nie-geïnkorporeerde sakeondernemings na voorsiening vir waardevermindering en ná aansuiwering vir voorraadwaardering.
- Ná voorsiening vir waardevermindering en ná aansuiwering vir voorraadwaardering.

- The data in this table refer to private households (including pension and provident funds and long-term insurance funds) and private non-profit institutions (e.g. churches, welfare organisations and sports clubs) that render social and community services to households.
- After adjustment for net remuneration paid to the rest of the world.
- Income from property consists of dividend receipts; interest receipts less interest payments; rent receipts less maintenance cost, mortgage interest and provision for depreciation; and the profits of non-corporate business enterprises after provision for depreciation and after inventory valuation adjustment.
- After provision for depreciation and after inventory valuation adjustment.
