

Intetho yeRhuluneli kwintlanganiso yamashumi asibhozo anesixhenxe yoosozabelo

Intshayelelo

Eyona njongo iphambili yeSouth African Reserve Bank (iBhanki) kukufezekisa nokugcina imeko ezinzileyo yamaxabiso. Nangona kunjalo, indima yeBhanki kwezoqoqosho idlula ngaphaya kokuqaphela umgaqo wolawulo-mali. Imeko ephantsi nezinzileyo yokukhula kwamaxabiso inikeza isiseko ekukhuleni kwezoqoqosho, kodwa ulawulo nokwaluswa kwenxene yamacandelo ezimali, kwakunye nokuvelela inkqubo yentlawulo yelizwe ziqinisekisa uphuhliso kwezoqoqosho.

Kulo nyaka uphelileyo kuye kwanyanzeleka ukuba siqhube imisebenzi yethu phantsi kweemeko ezinzima nezingenasiqinisekiso. Njengoko imiphumela yobunkenenkene nokungazinzi kwiimalike zezimali elizweni jikelele kutsha nje iyichaphazele nemalike yezimali kweli loMzantsi Afrika, sakuhlala sijongile ukuba obu bunkenenkene buyichaphazela njani imeko yezoqoqosho kweli. Kananjalo, kufuneka siqinisekise ukuba imisebenzi yangaphakathi yeBhanki ilawulwa ngohlobo olufanelekileyo. Namhlanje ndininikeza le ngxelo phantsi kwezi meko zoqoqosho olunkenenkene.

Namhlanje sikhupha uxwebhu lwengxelo yonyaka ngezoqoqosho (*i-Annual Economic Report*) equka iimeko ngokubanzi ngoqoqosho Iwangaphakathi nolwamazwe-ngamazwe, ngonyaka odlulileyo. Olu xwebhu lugxininisa kwezona ziganeko ziphambili kwezoqoqosho nezithe zanegalelo kwinkqubo yeBhanki. Umngxilo walentetho yam ukweyona misesbenzi yeBhanki isemqoka equka umgaqo wolawulo-mali, imiqathango yokusetyenziswa komgaqo wolawulo-mali, ukwaluswa koovimba beli begolide nemali zangaphandle, ulwabiwo lwemali, uzinzo lwemali, inkqubo yentlawulo yelizwe, ulawulo nolwaluso lweebhanki, intsebenziswano namazwe-ngamazwe nolawulo Iwangaphakathi.

Umgaqo wolawulo-mali

Kulo nyaka udlulileyo umgaqo wolawulo-mali ubujongene nobunzima. Njengoko ndanditshilo ngo-Agasti nyakenye, ukususela embindini ka 2006 kuye kwakho ifuthe ekukhuleni kwamaxabiso, elije laqinisa sitetha nje. NgoDisemba 2006, umlinganiselo wokukhula kwamaxabiso oyi-CPIX nyaka-nonyaka, ubulinganisela kumyinge we 5,0 ekhulwini xa uthelikiswa nomyinge we 3,7 ekhulwini ngo Aprili 2006. Izinga lokukhula kwamaxabiso belizinze ngaphakathi komlinganiselo ongumyinge we 3 ukuya ku 6 ekhulwini kwade kwangu Aprili 2007 apho likhule layakuma kumyinge oy 6,3 ekhulwini xa uthelikiswa nomyinge oy 5,5 ekhulwini kwinyanga edlulileyo. Ukususela ngoko izinga lokukhula kwamaxabiso lihleli ngaphandle komlinganiselo. Ekuqaleni, le meko ibiphenjelela kukwenyuka kwamaxabiso okutya nawepetroli, kodwa kutshanje kubekho ubungqina bokwenyuka kwamaxabiso jikelele kuquka nalawo eenkonzo.

Ezi ziganeko zibangele ukuba igqiza loMgaqo wolawulo-mali (MPC) lonyuse i-repurchase rate ngamanqaku asisiseko angama 50 ngo Juni 2006, okokuqala ukusesela kunya ka 2002. Oku kulandelwe kukwenyusa ngamanqaku asisiseko angama 50 kwimihlangano elandeleyo yeMPC kunya ka 2006. Ukuya kufikelela kuDisemba i-repurchase rate ibiyenuke yaya kuthi xhaxhe kumyinge we 9 ekhulwini ngonyaka.

Uxinzelelo kwizinga lokunyuka kwamaxabiso lubangelwe lifuthe lamazwe ngamazwe kwakunye nolwangaphakathi. Kwizinga lehlabathi, uqoqosho lwelizwe jikelele luqhube kile nokukhula ngamandla, nto leyo ephembelele uxinzelelo olumandla kumaxabiso e-oli kwakunye nawokutya.

Ngo Agasti wonyaka odlulileyo amaxabiso e-oli kumazwe ngamazwe afikelela kumazinga asondele kwi-US\$80 umphanda. La maxabiso aphenjelela kukwanda kweemfuno ezimandla nongquzulwano kwimeko zombusa-zwe nobunzima kwindawo ngendawo. Uxinzelelo kumaxabiso okuya nako kudlale indima. Imbalela egqubayo kwiinginqi ezithile kwakunye nokunyuka kwamaxabiso emveliso yezolimo, ingakumbi ingqolowa, umbona neswekile, neebio-fuels nazo zidiale eyazo indima kolu xinzelelo. UMzantsi Afrika nawo khange ube nakusinda kwezi nguqu. Uswazi lwembalela luye lwagquba kwizithili ezithile zeli, nto leyo ekhokhelele ekunyukeni kwezinga lamaxabiso okuya, ingakumbi awenyama nawombona. Kwinyanga kaOktobha nekaNovemba ka 2006, amaxabiso enyama anyuke ngomyinge omalunga no 20 ekhulwini nyakanonyaka, ngeli lixa imveliso yombona yonyuke ngomyinge ofikelela ku 6 ekhulwini.

Nangona izinga lokunyuka kwamaxabiso Iwehlabathi belulawuleka, uxinzelelo oluvelo kwamanye amacandelo lubangele ukuba umgaqo wolawulo-mali uhlale uxhobile kumazwe amaninzi.

Kwezoqoqosho Iwangaphakathi, igqiza loMgaqo wolawulo-mali (iMPC) lijongene nemingcipheko yokunyuka kwenkcitho ngabemi beli kwakunye nokwenyuka kwamazinga emali-mboleko. Kwisiqingatha sesibini somnyaka ka 2006, imfuno yomzi ngamnye ikhule kakhulu, yaya kuthi xhaxhe kumyinge we 7 ekhulwini ngonyaka. Nangona ixabiso lemali-mboleko lenyukile, izalathiso zentembeko kubathengi zisancumisa. Ekusondeleni kokuphela konyaka, intengiso yeenqwelo mafutha, ingakumbi ezisetyenziselwa ukukhwela, ibonakalise iimpawu zokudodobala. Okungapheli-mandla kwabathengi kubangelwe lizinga eliphezulu lokukhula kwemali-mboleko.

Emva kokuhexa ngomyinge we 15 ekhulwini komgangatho wonaniselwano ngeranti olusekelwe kurhwebo loMzantsi Afrika namazwe ngamazwe ukususela ngo Meyi ukuya kutsho ngo Julayi 2006, umgangatho wonaniselwano lweranti ubenegalelo kwimbonakalo yokwenyuka kwamaxabiso. Umgangatho wonaniselwano ngeranti uhleli kwizinga elamkelekileyo lorhwebo, nangona intsilelo yencwadi yogcino-mali yohlengahlengiso Iweentlawulo ngezorhwebelwano yenyukile. Okuvuyisayo kukuba ezi ntsilelo zihlawulwa ngokwaneleyo kukungena kwemali eyinkuzi.

Zikwakhona neempawu ezingabonakalisanga mingcipheko kwimbonakalo yezinga lokunyuka kwamaxabiso. Ukunyuka kweendleko zomsebenzi ngamnye bekungaxhomisi mehlo, nolawulo lukaRhulemente Iwemicimbi yezemali luqhube kile nokuxhasa umgaqo wolawulo-mali, noqoqosho olukhule ngasantya esomeleleyo. Izimvo ngokwenyuka kwamaxabiso zihleli kumlinganiselo obekiwego wokwenyuka kwamaxabiso.

Kwinyanga ezimbini zokuqala zonyaka ka 2007, amaxabiso e-oli ehlabathi jikelele athe ehla ngokumandla. Ixabiso le-oli ekrwada nebiza ngeNorth Sea Brent beliphantsi kangange US\$51 umphanda ngoJanyuwari. Ezi ziganeko zibe negalelo ekuthotyweni ngokuphangaleleyo koqikelelo Iwamaxabiso e-oli nokwenyuka kwamaxabiso. Kananjalo, ebekhona amahlumela eempawu zokudodobala kwenkcitho yomzi

ngamnye, ingakumbi ngokuphathelele kwintengiso yeenqwelo mafutha. I-MPC ikwayithathele ingqalelo into yokuba uhlengahlengiso kwinzala yemali-mboleko luthatha ixesha ukuba nemiphumela kwiumfuno zabathengi. Nangona imingcipheko yokwenyuka kwamaxabiso ibonwe njenqeyonyukileyo, ukuqhubekeka kokuzinza ngonaniselwano ngeranti, nokugcinakala kolawulo lwemali nguRhulumente kwakunye nokuphucuka kwezimvo ngokunyuka kwamaxabiso kubangele ukuba i-MPC iligcine limile ixabiso lemali-mboleko kwiintlanganiso zayo zika Februwari noAprili.

Kwintlanganiso yeMPC kajuni 2007, imbonakalo yokwenyuka kwamaxabiso ibinge mntak'aNgqika, ngelo xesha uluhlu lwamanani lubonakalise ukuba inkcitho yomzi ngamnye nokwanda kwemali-mboleko kuye kwathi gqolo ukwenyuka ngomyinge we 7 ekhulwini nangomyinge we 26 ekhulwini, ngokulandelelana kwazo. Amaxabiso e-oli amazwe ngamazwe aqhubekekile ngokwenyuka ade ayokufikelela kwi US\$78 umphanda ngo Julayi. Eli futhe lixhomisa amehlo lokwenyuka kwamaxabiso e-oli ekwenyukeni kwamaxabiso jikelele, liye ladodobaliswa kukuzinza kwezinga lonaniselwano ngeranti. Emva kokuba umlinganiselo ophezulu wokwenyuka kwamaxabiso ugqithiwe, kuye kwakhona iimpawu ezingancumisiyo ngezimvo zokwenyuka kwamaxabiso. Kananjalo, izivumelwano ngemivuzo ziqale ukwenyuka, nto leyo ibangele imingcipheko kwimbomo ngezokwenyuka kwamaxabiso. Le meko ingancumisiyo yenkangeleko yokwenyuka kwamaxabiso ibangele ukuba i-MPC yenuse i-repurchase rate kwiintlanganiso zayo zika Juni no Agasti ka 2007. Ngexesha lentlanganiso ka Agasti, ubunkene-nkene neenkqwithelo kwiimalike zemali zehlabathi beseziqalisile. Ngeloxesha ibingacacanga kwi MPC ukuba ezi nkqwithela ziya kuphelela kwimalike zezimali okanye zakuphumela nasekukhuleni kwezoqoqosho kweli nakwamanye amazwe. Eli gqiza labona kufanelekile ukuba lihlale lisemzekweni wemilinganiselo ebekiweyo yokwenyuka kwamaxabiso nokuba libeke esweni iziganeko zeemalike zezimali ngohlobo eziya kuchaphazela ngalo imbonakalo yokwenyuka kwamaxabiso.

Oku kuggithwa komlinganiselo ophezulu wokwenyuka kwamaxabiso kuwubuyisela emva umgaqo wolawulo-mali. Kodwa ke, kuyafuneka kuqatshelwe ukuba ezi ziganekoko zibangelwe ziimeko ezingaphandle kolawulo lwabaseki bolawulo mgaqo-mali. Sikwayigcinile nento yokuba ezi ziganeko zakuba nemiphumela kwizimvo ngezokwenyuka kwamaxabiso. Sakusoloko sithabatha amanyathelo afanekileyo nakulo naliphi na ifuthe elihlasela ukwenyuka kwamaxabiso. Olona qikelelo lutsha lweBhanki lokwenyuka kwamaxabiso lubonakalisa ukuba izinga lokwenyuka kwamaxabiso linokubuyela phakathi komlinganiselo oqingqiweyo kwisiqinggatha sesibini sonyaka ozayo.

Imiqathango yokusetyenziswa komgaqo wolawulo-mali

Ukuqinisekisa ukuba ukuzaliseka kweenjongo zomgaqo wolawulo-mali kuyahambelana nezigqibo zeMPC, iBhanki ifezekisa iimfuno zemihla ngemihla zemali ejikeleza ngaphandle kweBhanki kwiimalike zika wonke-wonke kumlinganiselo ophakathi kwe R10 yezigidi-gidi ne R15 yezigidi-gidi. I-Bhanki ikwandise noluhlu lwamaphepha-mali ekunokubanjiwa ngawo ekufuneni imali. UKususela ngomhla we 23 Meyi 2007, amahlelo amabini alamaphepha-mali athi amkeleka. Ihlelo lokuqala lala maphepha-mali liquka iiGovernment bonds, Land Bank bills, STRIPS, SARB debentures nee Treasury bills. Elesibini liquka amaphepha-mali angengokaRhulumente nangengoweebhanki nathi adityaniswe kwi All Bond Index ye Bond Exchange of South Africa. Ababoleki-mali abasebenzisa olu hlelo lwebibini kufuneka babambise ngamaphepha-mali amaninzi kunesiqhelo.

Ngokubambisene nabanye abathathi-nxaxheba ezimalikeni, iBhanki ithe yakwazi ukumelana neemfuno ebezisilela nezibonakaliswe kwi-South African Overnight Average (Saonia) rate, ngokuthi iyitshintshe ifake esikhundleni sayo i-South African Benchmark Overnight Rate (Sabor).

Ukhuliso nolawulo loovimba

I-Bhanki iqhubekile ukunyusa izinga layo loovimba abasemthethweni. Oovimba begolide neemali zangaphandle banyuke ukusuka kwi-US\$23 yezigidi-gidi ekupheleni kuka Matshi 2006 bayo kufikelela kwi-US\$29,8 yezigidi-gidi ekupheleni kuka Agasti 2007. Kwangeli xesha, ukuhlawulwa ngaphambi kwexesha yiBhanki kwemali-mboleko eyi US\$1 yezigidi-gidi neyayibolekwe ngonyaka ka 2004, kubangele ukwenyuka kwemo yesambuku sehlabathi ukusuka kwi US\$19,5 yezigidi-gidi kuye kwi US\$27,4 yezigidi-gidi. Oku ukuhlawulwa phambi kwexesha kubangele ukonga kweBhanki, kwaphinda kwamkelwa ngezandla ezishushu ngamahlakani eBhanki ezimalikeni.

I-Bhanki ithe yanika umqwalasela uphuhliso lwendlela egcina ngayo oovimba. Kulo mba, iBhanki ithe yasebenzisana neBhanki yehlabathi phantsi kwePhiko layo eliyi-Reserves Asset Management Programme yeebhanki ezingovimba. I-Bhanki iqhubekile ngenkcitho-mali yokuqequesha abasebenzi ababandakanyekayo kwimiba yokugcinwa koovimba nolawulo lwemingcipheko. Ngaphezu koku, umgaqo wotyalo-mali weBhanki uphinde wajongwa, waze waphuculwa ngokuthi kusekwe igqiza lokulawula oovimba (Reserves Management Committee).

I-Bhanki noNondyebo wesizwe (National Treasury) babambisene kwiphulo lokunyusa inqanaba loovimba nokulawula isambuku semali ejikeleza ngaphandle kweBhanki. UNondyebo wesizwe uncedisile ekufunxeni isambuku semali esithi sidaleke xa iBhanki ithenga imali yangaphandle. Ekupheleni kuka Julayi 2007, i-akhawunti yabucala kaNondyebo wesizwe negcinwa yiBhanki iyokufikelela kwi R54,5 yezigidi-gidi kuquka nenzala. Kuye kwafikelewa kwsivumelwano sokuba kuhlawulwe imali ebisele kwi Gold and Foreign Exchange Contingency Reserve Account (GFECRA). Zikwathathyathiwe nezigqibo zokuba kwixa elizayo, yinzala okanye ilahleko echaphazela isambuku semali ejikeleza ngaphandle kweBhanki kuphela eyakuthi ihlawulwe roqo. Esi sivumelwano sifanele sithobe isaxa semali ejikeleza phakathi kweBhanki noNondyebo wesizwe, siphinde sidodobalise ifuthe elinziwa sesi sambuku semali sichazwe ngentla. Phantsi kwezi zivumelwano, iBhanki iye yanikezela ngesixa esingama R319,3 yezigidi (kuquka nenzala) kuNondyebo wesizwe ukuze ahlawule imali ebisele kwi GFECRA ukususela ngomhla we 31 Matshi 2006.

Ulwabiwo lwemali

Ukuqinisekisa ukuba yimali esemthethweni kuphela ejikeleza ngaphandle kweBhanki, iinzame zokuthintela ukwenziwa kwemali ngomgynyathi zisaqhubeke.

Ngokusebenzisana neebhanki isigaba sokuqala sokusetyenziswa kwe-Integrated Cash Management System siye sagqitywa. Le nkqubo inganegalelo ekuphuculeni nasekuphuliseni indlela olusebenza ngayo ulawulo lomthamo wemali kwizwe lonke, khon'ukuze ithobe iindleko zokwenza imali.

Ngokusebenzisana namapolisa, iinkampani ezithutha imali, iibhanki kwakunye ne South African Banking Risk Information Centre, isiseko se Cash Risk Identification and Mitigation siye saphumelela. Le nkqubo ichaza imigaqo elawula ukuthuthwa kwemali

ukwenzela ukunciphisa ubiwo lwemali ezibhankini nokoxuthwa kwemali ngenkani kwabo bayithuthayo. Kwakhona, le migao iyakuphinda ipapashwe nguMphathiswa wezokhuseleko.

Inkqubo yentlawulo yelizwe

Ixabiso elipheleleyo lentlawulo kwi-South African Multiple Option Settlement (SAMOS) lifikelele kwelona zinga liphakamileyo le R5,6 triliyon iekupheleni kuka Julayi 2007, emalunga ne R280 yezigidi-gidi ngemini. Le ntlawulo ikwadibana intlawulo ephuma kwiimalike zezabelo nezemboleko-mali. Kunyaka ka 2006 noka 2007, malunga nomyinge we 90 ekhulwini yeentlawulo kwi-SAMOS yenziwa ngexesha elililo emini yaze intsalela yenziwa ebusuku.

Umyalelo malunga nendlela yokuziphatha kwinkqubo yentlawulo yeebhanki nabanye abantu uyakuqala ukusebenza apha ekuhambeni konyaka ka 2007. Ngo Meyi 2007, iBhanki iqalisile ngenkcukacha zokuvandlakanya abathathi-nxaxheba kwinkqubo yentlawulo mali abangezozibhanki. Uqwalaselo olujongene ngqo lubekwa ekusebenzeni kakuhle kwabasebenzi bendlu yokufezekisa intlawulo.

Emva kompoposho womthetho wolawulo mali-mboleko ka 2007 (National Credit Act) kunyanzeleke ukuba kubekho iinguqu kumthetho olawula inkqubo yentlawulo yelizwe ka 1998. Ezi nguqu zenze akwavumeleka ukuphatha ngobandlululo imiyalelo yentlawulo.

Uzinzo lwemali

Ukuxhasa iinjongo zayo zokufezekisa nokugcina imeko ezzinileyo yamaxabiso, iBhanki ikwafuna ukuqaphela nokujonga amakhwiniba athile kwinkqubo yezemali kwaye ibeke esweni izoyikiso nokuxega okungathi kudalwe zizophazamiso kule nkqubo. Ngokuhlolola izalathiso zobume bezezimali, inkqubo yezimali ifunyaniswe yomelele. I-Bhanki ikwathathe inxaxheba kwi Coordinated Compilation Exercise ye International Monetary Fund (IMF) enenjongo zokupuhlisa amalinge ezzizwe ngezizwe wokuqokelela ezi zalathiso zobume bezezimali.

I-Bhanki ikwavavanye nenkqubo yolawulo lwezimali eMzantsi Afrika khon'ukuze ihambelane kakuhle nemiqathango namazinga abekwe yi-Financial Stability Forum ye Bank for International Settlements (BIS). Emiye imicela-mngeni kule nkqubo isemi, kwaye iqua imiphumela ehambisana nokungena kweNational Credit Act, deposit insurance schemes, ukuphendlwa kobulungu boMzantsi Afrika kwi Financial Action Task Force, iinzame zokuzisa ishishini lokuzikhuela ekulahlekelweni yimali ezimalikeni (hedge fund industry) ngaphakathi komthetho olawulayo, kwakunye nokumiselwa kwe Basel II yeebhanki ngomhla we 1 Janyawuri 2008.

Ekusebenzisaneni kunye nabanye abanebango kuzinzo lwemali, iBhanki iye yandisa imizamo yokukhusela intlekele enokwenzeka xa kunokungabikho zinzo kwezezimali. Kulo nyaka siwuphicothayo, inkqubo yokuqinisekisa ukuqhubeka kwemisebenzi kwicandelo lezimali mhla ngentlekele iye yavavanywa.

Ulawulo nolwaluso lweebhanki

I-Bhanki inoxanduva lokuqinisekisa ukuba ukongamela kwiibhanki zasekhaya kuhambisana nendlela esetyenziswayo elizweni jikelele. Okuseleyo nokubalulekileyo

kukulungiselelw a kokuqala kokusetyenziswa kweBasel II. Ukungena nokusetyenziswa kwale nkqubo kujongene nokuguqula imithetho yolawulo zibhanki, nokuqinisekisa impumelelo yokuqala kweBasel II ngomhla 1 Janyawuri 2008.

Ukuguqukel a kwi-Basel II kwenze kube nesidingo sokuqinisa intsebenziswano neebhanki. Le ntsebenziswano iye yaquka ukutelelw a kweebhanki ngabasebenzi beBhanki, izicelo zolwazi ngemiphumela ye Basel II koovimba beebhanki, kwakunye neentlanganiso zokuvandlakanya ukuba iibhanki zikulungele na ukusebenzisa imigaqo ye Basel II.

Ngokweemfuno zakutsha nje zoshishino nophuhliso lweemalike, kwakunye nemiqathango ye Basel II, incwadana ephathelene notshintsho lwemithetho elawula iibhanki yaye yaphunyezw a ligqiza elimileyo elijongene nokutshintshwa komthetho olawula iibhanki ngoNovemba 2006. Oku kutshintshwa kwalo mthetho kuye kwaxoxwa ePalamente phakathi kuJuni walo nyaka. Lo mthetho kulindeleke ukuba uphunyezw a ekupheleni kwalo nyaka, khon'kuze ugale ukusebenza ngomhla we 1 Janyawuri 2008. Imiyalelo ephathelene neebhanki ivavanyiwe ngokupheleleyo khon'kuze ivumelane nemiqathango ye Basel II kananjalo inike iindlela ngendlela zokusetyenziswa kwe Basel II eMzantsi Afrika.

Uvumelwano novavanyo kuhlaziyo lwe 25 Core Principles for Effective Banking Supervision yeqqiza le Basel kulwaluso lweebhanki lwaggitywa ngo Oktobha 2006. Uvandlakanyo lwamasolota asileleyo nabonakaliswe lolu vavanyo lwaggitywa. Xa kukho imfuneko, utshintsho luyakuthi lwenziwe kwi Banks Act ka 1990 ukuqinisekisa ulwaluso olululo.

Kulo nyaka-mali sitetha ngawo, amazinga amkelekileyo eebhanki malunga nokhwabaniso lwemali kwakunye nomthetho olwa ukunikezelwa kwabanqolobi imali anikwe ingqwalasela. Malunga namashumi amane amashishini akrokrelekayo namayelenqe otyalo-mali nathe anika imbonakalo yokuqhube ka nemicimbi yeebhanki ngokungekho semthethweni, aphantsi kophando.

Intsebenziswano namazwe-ngamazwe

UMzantsi Afrika uthabathe indawo yokuba ngusihlalo we G-20 yalo nyaka ka-2007. Kwaye iBhanki ibambisene noNondyebo wesizwe ekuququzeleleni lo mxhamsholo we G-20. Eli qumrhu le G-20 libandakanya amazwe abalulekileyo kulawo asahlumayo nasele ehlumile kwezoqoqosho. Intlanganiso ze-G20 ezimbini zamasekela baphathi zibanjelwe e-Pitoli naseThekwini, zaze iinkomfa ezimbini ze African Policy zaqhutywa ngamxhel'omnye.

Ixesha lethu njengosihlalo lakuba ngunozala wokusingatha intlanganiso yaBaphathiswa bezimali kune neeRhuluneli zeziwe ezikwi G20, eya kubanjelwa eNtshona Koloni ngomhla we 17 ukuya kowe 18 ku Novemba 2007. Imiba ebalulekileyo ezakuphicothwa iyakubandakanya nomba wokuvuselela amaziko e-Bretton Woods, amahland'enyuka kumaxabiso eekhomodithizi, nemiba yolawulo zimali ngooRhulumente nephathelele ekukhuleni kwezoqoqosho nophuhliso. Ezi zingongoma ezithe zaqatsela kwiinkomfa ze G20 ebezbanjelwe eBrazil, eMelika nase Turkey ebutsheni balo nyaka.

Unxibeelwano lweBhanki namazwe angaphandle luseluhle kakhulu ekomelezeni intsebenziswano kune nabanye oovimba beebhanki kune namaziko amazwe

ngamazwe. Uqwelaselo lwabucala luye lwanikezelwa kwilizwekazi i-Afrika nakwimanyano yamazwe akumazantsi e-Afrika (SADC), ngenjongo zokuququzelela imanyano kwi SADC. I-Bhanki isaqhubeaka nokukhokela igqiza leeRhuluneli (CCBG) zakwi SADC.

Kwindima yayo njengenkokheli ye SADC Payment System Project, iBhanki iqhubekile nokuququzelela ukuphucula nokuqinisekisa ukuba iinkqubo zentlawulo kwi SADC ziayafana. Ukuzakuthi ga ngoku, eli phulo ligxininise ekuqinisekiseni ukusetyenziswa kwenkqubo yentlawulo ngexesha elililo (Real Time Gross Settlement Systems), ukusetyenziswa kobuxhakaxhaka bale mihla nasekwaluseni inkqubo yentlawulo. Ngokwale miba ingasentla, kuye kwaba nenkqubela ebonakalayo. Amasolota asanikwa ingqwalasela kweli phulo aquka iintlawulo ezenziwa ngabo baphangela kwamanye amazwe angaphandle, ukunciphisa imingcipheko kwiintlawulo ezenziwa kubathengisi, iintlawulo eziphathelele kumaphepha-mali kwakunye noqequesho lwabo balusa inkqubo yentlawulo. Uncedo olongezelwego luyakunikezwa iDemocratic Republic of Congo ne Madagascar mayela nokuceba uphuhliso lweenkqubo zawo zentlawulo.

I-Bhanki iyaqhubeaka nokuthatha inxaxheba kwimicimbi ye BIS. Inxaxheba ethathwa yiBhanki negalelo layo kwi Foreign Exchange Settlement Risk Subgroup yeqqiza le BIS kwi Payment and Settlement System, ijinisekisa ukuba ihlala imelana neempuhliso zamazwe ngamazwe nokumisela iinkqubo ezizizo.

Imvisiwano nezinye iiBhanki ezingoovimba ikhokhelele ekutyikityweni kwesivumelwano (Memoranda of Understanding) kunye neeBhanki ezingoovimba zase China nase Peru kulonyaka udlulileyo. Ngaphezu koko, iBhanki ifumene abandwendweli abaninzi abaphuma kwezinye iiBhanki ezhambiselana nonaniselwano ngolwazi. Kwakhona iBhanki igcine unxibelewano kunye namanye amaqumrhu amaninzi. Impathiswano yethu ne IMF kwakunye neBhanki yehlabathi (World Bank) ikhokhelele kwiinkomfa eziliqela kunye nezfundo ezinikezelwa yikholeji yeBhanki kunyaka ka 2007. Ezi nkomfa nezi zifundo ziye zavuleka kubathabathi nxaxheba abasuka kwezinye iiBhanki nakumaziko ezezimali ze Afrika iphela.

Ulawulo Iwangaphakathi

I-Annual Report yeBhanki inikwe oosozabelo phambi kwale ntlanganiso. Amacwecwe apheleleyo ezilinganiso zeBhanki abonakalise ukwenyuka ukususela kuma R168 yezigidi-gidi ekupheleni kuka Matshi 2006 ayakuthi xhaxhe kuma R220 yezigidi-gidi ekupheleni kuka Matshi 2007. Oku kwenyuka kube ziziphumo zokwanda koovimba begolide neemali zangaphandle, kwaye iye yahlawulelwia ikakhulu kukukhula kwemali efakwa nguRhulumente, ukwanda kwemali ejikeleza ngaphandle kweBhanki, kunye nemiphumela yovavanyo kuhlengahlengiso koovimba njengonobangela weentshukumo zonaniselwano ngeranti. Ezi zihlengahlengiso zibonakaliswe kukwenyuka kwe GFECRA.
