

SOUTH AFRICAN RESERVE BANK

### **Work Integrated Learning Programme (WILP) for IT**

The Bank actively contributes to addressing scarce and critical skills through its WILP for Information Technology (IT). The programme's aim is equip candidates with the skills needed by the Bank's Business Systems and Technology Department, enhancing the Department's capabilities. Successful applicants will be placed in the IT environment to acquire required competencies.

To be considered for this programme, candidates must be South African citizens and possess a national diploma (NQF6) or bachelor's degree (NQF7) in the relevant field. Candidates are requested to indicate their area(s) of specialisation or preference(s) in any of the following fields:

- Cloud Engineering
- Artificial Intelligence and Machine Learning
- Information Management
- Data Science and Analytics
- IT Technical Security
- IT Network Security
- Integration Development
- Java/Weblogic
- Test Automation
- Business Intelligence/Analytics
